through examining the work of w b yeats james joyce and samuel beckett katherine ebury shows cosmology had a considerable impact on modernist creative strategies developing alternative reading models of difficult texts such as finnegans wake and the trilogy

the title chapter seven argues that one of the dogmas from twentieth century physics that it is not possible to travel faster than the speed of light is in fact wrong this provides an exciting possibility in the 21st century and beyond a new cosmological outlook where humanity can reach to the stars previously

published papers presented to the russian academy of sciences are accompanied by other unpublished papers an attempt is made to explain dark energy arising from tachyonic gravity which may also explain the expanding cosmos the contribution of deceased american physicist g feinberg is presented although the author obtained his derivation of tachyonic physics independently and by a more fundamental space time derivation much of the book is accessible by undergraduates in mathematics or physics or a general reader interested in broadening his or her mind

building on the work of teilhard de chardin the new cosmology integrates scientific facts and theories including discoveries about the expanding universe and evolution and proposes that creation is developing into greater complexity but how are we to understand concepts like original sin and redemption if creation isn't complete and humanity is still in process how does one retrofit religious tradition and scripture into this scenario is there room for the historical jesus in the new cosmology while a ready concern for all christians this question has unique implications for women religious whose lives are centered on the person and mission of jesus christ how is a catholic sister to understand her vows of poverty chastity and obedience in light of a cosmology in which the need for redemption and the role of jesus are significantly redefined the heavens are telling the glory of god probes these questions and offers possible answers beginning with the experiences of women religious and their encounter with the new cosmology or universe story this book seeks to mediate among the various perspectives and proposes how informed and reflective engagement with science tradition and theology can bridge the generational divides and foster a spirituality that is both emergent and incarnational access to online discussion and reflection questions is included

he guides us as he explores our journey through the universe of the new cosmology in the course of his intellectual journey he has opened up so many new ways by which to view the world and the cosmos that surrounds and embraces us so that we come to feel at home in the universe he has taught us that we are part of the cosmos that our bodies carry within them all of the elements of the periodic table that derived from the dust of exploding stars furthermore dick states that all of reality consists of interconnected relationships in motion permeated by a sacred radiant energy he tells us the four cs of the great story cosmogenesis creativity chaos and compassion in this great story it is we who are the second coming as participants with god as co creators of the ever expanding universe

a must read for every concerned american and especially for every christian who weeps at the graveside of his culture r c sproul a cataclysmic change has occurred as our culture has shifted toward belief in oneism every religion and philosophy fits into one of two basic worldviews oneism asserts that everything is essentially one while twoism affirms an irreducible distinction between creation and creator the other worldview exposes the pagan roots of oneism traces its spread throughout western culture and demonstrates its inability to save for bodily holiness and transformed thinking we depend entirely

on one amazing thing the incredibly powerful message of the gospel to a sinful world which is the ultimate expression and goal of twoism the only hope is in christ alone
