spirituality is a difficult subject in the modern world everywhere from popular media to the university from the bookshelf to the dinner table religions are derided or marginalised and public figures such as richard dawkins set upon anyone who admits to a belief in god it seems that science and religion are fundamentally at odds and that a mutual respect is unacceptable to either in their parallel pursuit of truth yet the majority of enlightenment authors engaged with both science and spirituality and did not lose their faith today we tend to see these authors as not having applied full scientific rigour to their religious beliefs but are we correct in dismissing this aspect of their lives so easily in secularism mike king examines the elements of religion philosophy and science which have contributed to an almost total disavowal of spirituality by contemporary western intellectuals he engages with a wide range of thinkers including pythagoras marx spinoza darwin and nietzsche and incorporates detailed studies of a variety of spiritual leaders some of whom readers are unlikely to have considered in this way before to uncover why the western world no longer has any interest in devotion or accords it any respect
