everyone knows what it feels like to be in pain scraped knees toothaches migraines giving birth cancer heart attacks and heartaches pain permeates our entire lives we also witness other people loved ones suffering and we feel with them it is easy to assume this is the end of the story pain is pain is pain and that is all there is to say but it is not in fact the way in which people respond to what they describe as painful has changed considerably over time in the eighteenth and nineteenth centuries for example people believed that pain served a specific and positive function it was a message from god or nature it would perfect the spirit suffer in this life and you wouldn't suffer in the next one submission to pain was required nothing could be more removed from twentieth and twenty first century understandings where pain is regarded as an unrelenting evil to be fought focusing on the english speaking world this book tells the story of pain since the eighteenth century addressing fundamental questions about the experience and nature of suffering over the last three centuries how have those in pain interpreted their suffering and how have these interpretations changed over time how have people learnt to conduct themselves when suffering how do friends and family react and what about medical professionals should they immerse

themselves in the suffering person or is the best response a kind of professional detachment as joanna bourke shows in this fascinating investigation people have come up with many different answers to these questions over time and a history of pain can tell us a great deal about how we might respond to our own suffering in the present and just as importantly to the suffering of those around us

moving beyond previous scholarship he gives us a locke as much concerned with the effective functioning of government as with the roots of its moral legitimacy book jacket
