push software design and the cultural politics of music production shows how changes in the design of music software in the first decades of the twenty first century shaped the production techniques and performance practices of artists working across media from hip hop and electronic dance music to video games and mobile apps emerging alongside developments in digital music distribution such as peer to peer file sharing and the mp3 format digital audio workstations like fl studio and ableton live introduced design affordances that encouraged rapid music creation workflows through flashy user friendly interfaces meanwhile software such as avid s pro tools attempted to protect its status as the industry standard professional daw of choice by incorporating design elements from pre digital music technologies other software like cycling 74 s max asserted its alterity to commercial daws by presenting users with nothing but a blank screen these are more than just aesthetic design choices push examines

the social cultural and political values designed into music software and how those values become embodied by musical communities through production and performance it reveals ties between the maximalist design of fl studio skeuomorphic design in pro tools and gender inequity in the music products industry it connects the computational thinking required by max as well as izotope s innovations in artificial intelligence with the cultural politics of silicon valley s design thinking finally it thinks through what happens when software becomes hardware and users externalize their screens through the use of midi controllers mobile media and video game controllers amidst the perpetual upgrade culture of music technology push provides a model for understanding software as a microcosm for the increasing convergence of globalization neoliberal capitalism and techno utopianism that has come to define our digital lives

a groundbreaking exploration of the shifting landscape of technological innovation and how it has transformed into a global phenomenon challenging the traditional dominance of silicon valley the us is the source of just about all the technologies that define modern life personal computers operating systems smartphones e commerce web browsers email search engines social networks electric cars and the rest and most of the tech companies that created and monetized these technologies are also in the us in this book mehran gul the winner of the financial times mckinsey bracken bower prize asks is that changing less than a decade ago the sentiment towards chinese tech compa nies was often dismissive and complacent now the alarm bells are ringing but as the commentariat pontificates how the us china tech battle will play out an equally interesting question to ask is are there more chinas out there samsung a south korean conglomerate competes with apple to be the world s largest manufacturer of smart phones arm founded in the uk develops chip designs that are used in more than 90 of all mobile devices spotify based in sweden is the most popular music streaming service in the world that s not all the world s most important semiconductor company tsmc is in taiwan the other most important company in the semiconductor industry asml is in the netherlands some of the world s best known games like minecraft candy crush and angry birds came from gaming studios in the nordics nearly all the major electric battery manufacturers like catl lg and sk on are in asia this is a story about technology and the places where it finds its way into the world silicon valley has for half a century been unrivalled in spinning out technologies and fast growing high value billion dollar plus tech companies the apples facebooks googles of the world that made it the center for the most rapid creation of wealth in human history its secrets are spreading to more places the geography of innovation is shifting the world has a lot more high value tech companies than ever before growing a lot faster than ever before in a lot more places than ever before this is a book about these places

about the book the contents of most of the chapters included in this volume were originally presented and discussed during the academic workshop high tech valleys and research triangles in the east of the netherlands and elsewhere held on 30 november and 1 december 2005 at the wageningen international congress centre wicc in the netherlands at that time we had an informal agreement with rob bogers series

editor of the wageningen ur frontis book series that if the quality and quantity of the talks and papers at the seminar would be sufficient and if there was willingness among the potential authors an edited book volume based upon the results of the workshop would be a possibility after the workshop when we had a critical mass of ten chapters and a dedicated group of committed authors the book project was given the green light as editors we realized that there were still a couple of topics and themes missing and when we had found colleagues for these four additional chapters that needed to be written our frontis book was on the roll although most of the time it was great fun the whole process of writing reviewing rewriting editing and proofreading took a lot of time much more time than we originally had foreseen we would like to thank all authors of the fourteen chapters of this book for their excellent contributions
