in these essays donald wiebe unveils a significant problem in the academic study of religion in colleges and universities in north

america and europe that studies almost always exhibit a religious bias to explore this issue wiebe looks at the religious and moral agendas behind the study of religion showing that the boundaries between the objective study of religion and religious education as a tool for bettering society have become blurred as a result he argues religious studies departments have fostered an environment where religion has become a learned or scholarly practice rather than the object of academic scrutiny this book provides a critical history of the failure of 20th and 21st century scholars to follow through on the 19th century ideal of an objective scientific study of religious thought and behaviour although emancipated from direct ecclesiastical control and to some extent from sectarian theologizing wiebe argues that research and scholarship in the academic department of religious studies has failed to break free from religious constraints he shows that an objective scientific study of religious thought and practice is not only possible but the only appropriate approach to the study of religious phenomena

over the past thirty years much has been written about the critical theory of society that was produced by a small group of left wing hegelians in the institute of social research in frankfurt am main germany and in the united states this book seeks to make a contribution to the continued development of the critical theory of society and religion as it offers a corrective to the one sided positivistic development of the modern social sciences as well as to the increasing social irrelevancy of the contemporary christian church max horkheimer s critical theory of religion is a content analysis of the critical theory of religion of max horkheimer which was developed throughout almost all of his writings and later interviews from 1926 to 1973 the year of his death

paul helm presents a new study of the nature of religious faith investigating what makes it reasonable religious belief needs to meet and sustain philosophical scrutiny just as any other type of belief does nothing about religion purchases immunity from this but at the same time religious epistemology must also respect the contours of religion the distinctiveness of the subject matter of religious belief helm looks sympathetically at two currently prominent ways of defending the rationality of religious belief reformed epistemology and the cumulative case for theism he argues that the reasonableness of faith depends not only on beliefs about the world but also on beliefs about oneself for instance about what one wants about one s hopes and fears and on what one is willing to trust helm goes on to look at the relations between belief and trust and between faith and virtue and concludes with an exploration of one particular type of belief about oneself the belief that one is oneself a believer this is a book for anyone interested in the basis of

religious faith
