presents international energy projections through 2035 includes outlooks for major energy fuels and associated carbon dioxide emissions

in the wake of the fukushima daiichi nuclear power plant accident questions are being raised about the future of the uranium market including as regards the number of reactors expected to be built in the coming years the amount of uranium required to meet forward demand the adequacy of identified uranium resources to meet that demand and the ability of the sector to meet reactor requirements in a challenging investment climate this 24th edition of the red book a recognised world reference on uranium jointly prepared by the oecd nuclear energy agency and the international atomic energy agency provides analyses and information from 42 producing and consuming countries in order to address these and other questions it offers a comprehensive review of world uranium supply and demand as well as data on global uranium exploration resources production and reactor related requirements it also provides substantive new information on established uranium production centres around the world and in countries developing production centres for the first time projections of nuclear generating capacity and reactor related requirements through 2035 incorporating policy changes following the fukushima accident are also featured along with an analysis of long term uranium supply and demand issues

this edited volume examines deterrence and the defense efforts of european states neighboring russia following the crimean intervention deterrence after being largely absent from debates among academics and policy makers for almost a quarter of a century has made a comeback in europe since russia s annexation of crimea and the start of the military conflict in ukraine s donbass region eastern and northern european states have revised their assessments of russia s policies and intentions the approach used by russia in ukraine has rendered lessons learned from the cold war deterrence only partially applicable due to the changing security situation in europe the emergence of the cyber realm a smaller emphasis on nuclear deterrence and the ideological conflict between russia and the west are among the key differences between the cold war and the current security environment structured into two parts the first part discusses conceptual aspects of deterrence while the second discusses ten country case studies which include both nato and non nato countries this allows for an in depth analysis of the changing character of deterrence and its practical application by russia s european neighbours this volume will be of much interest to students of strategic studies

european politics russian foreign policy security studies and international relations in general

more and more people believe we must quickly wean ourselves from fossil fuels oil natural gas and coal to save the planet from environmental catastrophe wars and economic collapse in this 2006 book professor jaccard argues that this view is misguided we have the technological capability to use fossil fuels without emitting climate threatening greenhouse gases or other pollutants the transition from conventional oil and gas to their unconventional sources including coal for producing electricity hydrogen and cleaner burning fuels will decrease energy dependence on politically unstable regions in addition our vast fossil fuel resources will be the cheapest source of clean energy for the next century and perhaps longer which is critical for the economic and social development of the world s poorer countries by buying time for increasing energy efficiency developing renewable energy technologies and making nuclear power more attractive fossil fuels will play a key role in humanity s quest for a sustainable energy system
