understanding the global economy names the first step in coping with or transforming the flawed global ethics to that end the author explains the economic theory social science and thought that formed the basis of the global system applied to the sense of our current crisis this book shows the ethics and forces that make the global market work as it does and how it fails it presents a balance of the historical basis for global markets with the relevant economic theories ethics ideology inclusive research of all the leading scholars the current issues of the crisis and the failed solutions through the intellectual background with an expose of the current crisis the author leads us to a seemingly ironic prescription which he lives the willing caring heart of humanity that knows no bounds the book presents the solution by an analysis of the economic history from antiquity through the present observations and research of the likely solutions and decades of proactive work to enact the lasting solution

too many people provides a clear well documented and popularly written refutation of the idea that overpopulation is a major cause of environmental destruction arguing that a focus on

human numbers not only misunderstands the causes of the crisis it dangerously weakens the movement for real solutions no other book challenges modern overpopulation theory so clearly and comprehensively providing invaluable insights for the layperson and environmental scholars alike ian angus is editor of the ecosocialist journal climate and capitalism and simon butler is co editor of green left weekly

this book combines the field of economics especially monetary theory with other disciplines like ecology physics humanities social sciences and development theory this transdisciplinary approach makes the book a unique contribution for researchers students policy makers and professionals working in governmental or nongovernmental institutions as well as anyone interested in society s well being and achieving a true social ecological transformation it is written in an accessible language in order to reach a broad audience in 2015 more than 190 world leaders recognized that the world is on a collision course max neef and committed to 17 sustainable development goals sdgs many conferences and high level meetings have been held since then and one of the most frequently discussed topics is how to finance these goals there is a widespread belief that coming up with more money for sustainable development will do the trick usually the discussions focus on finding additional financial resources in order to achieve the goals faster in this book it is argued that not only is more money needed but it needs to be a different kind of money the book demonstrates that all but one of the sdgs are directly linked to our monetary system which being completely unnatural can be seen as the most important but at the same time least recognized reason for market failure many people think we just need to do more faster better very few say that we have done things fundamentally wrong and that the institutions and values which motivated us to do those things need to be changed it will be concluded that only if we change our unnatural design of money to a more natural one will we be able to reach these goals

the annual global competitiveness report is widely recognized as the world s leading cross country comparison of data and information relating to economic competitiveness and growth over the years the report has become the most authoritative and comprehensive assessment of the comparative strengths and weaknesses of national economies throughout the world the world economic forum continues its tradition of excellence with the global competitiveness report 2002 2003 which provides the most updated and recent data rankings and analysis of 75 industrialized and emerging economies and the latest thinking and research from prominent academics and international institution leaders on global competitiveness this year s report begins by presenting the widely quoted global competitive index that really comprises two indices one for growth and one for productivity it then provides global and regional analyses with examinations of the competitive landscapes of africa asia central and eastern europe and latin america essays on a wide range of special topics follow including national innovative capacity governance foreign direct investment and trade performance the report concludes with detailed country profiles data presentation and an exhaustive survey of senior business executives that touches on business conditions infrastructure the character of the regulatory regime the quality of government organized labor corruption and tax evasion the global competitiveness report 2002 2003 provides essential information for business leaders government decision makers and for academics to examine the critical challenges facing a multitude of the world s economies

ecological economics can help create the future that most people want a future that is prosperous just equitable and sustainable this forward thinking book lays out an alternative approach that places the sustainable wellbeing of humans and the rest of nature as the overarching goal each of the book s chapters written by a diverse collection of scholars and practitioners outlines

a wide variety of new forms of money have been developed in recent decades as a challenge or complement to the official dominant currencies lets local currencies carbon currencies and bitcoins are all examples of this new trend these currencies are at the heart of a larger movement that questions the present state of money and argues that new currencies might help to build resilient economies and warmer social relations this book focuses on radical alternative proposals as well as on small scale experiments and makes use of the analytical tools of philosophy and of economics with one main question in mind can alternative currencies constitute desirable alternatives to the present monetary system overall the book will raise serious doubts regarding the capacity of such currencies to deliver on their promises in part it will show that several arguments in favour of alternative currencies are lacking in consistency and clarity and are thus in need of thorough revision more fundamentally it will argue that these currencies rarely succeed in fulfilling their objectives and that their fulfilment would entail significant conflicts with justice and economic efficiency this book is addressed to researchers in economics politics and philosophy of money especially those working on alternative monetary systems

this volume explores the implications of the covid 19 pandemic for the sustainability of the present global political and economic system and the extent to which that system may as a result be undergoing transformation towards this aim the contributing authors raise a number of key questions first what is likely to be the impact of the pandemic on the current global order based on neoliberal hyper globalization second what insights do earlier pandemics along with other inter related crises such as those of climate inequality social reproduction and continued fallout of the global financial crisis offer for understanding the medium to long term implications of covid 19 third to what extent might the covid pandemic lead to progressive political transformations towards this latter goal the contributors to this volume also offer a number of suggestions as to what a post covid 19 world might look like and how post covid transformations might be channeled in a direction more conducive towards social justice and equality the chapters in this book were originally published as a special issue of globalizations

master s thesis from the year 2012 in the subject business economics supply production logistics grade 1 0 honours degree course supply chain management language english abstract today most multinational corporations mncs are eager to install sustainable standards not just within their own but also within their supply chain operations while the two pillars of sustainability economic and environmental are well researched within this field of business the third pillar social sustainability sss lags behind within the researchers focus however because of recent social scandals within the supply chain operations of multinationals an investigation targeting social sustainability and its effective implementation within the supply chain would provide important insights into such yet neglected field of research this thesis tries to tackle this issue and analyses whether mncs extent their sss practices to suppliers in regulatory distant countries the same way as they do within countries close to their home market the thesis intends to fill the research gap which exists around sss and provides valuable insides into how consistent mncs are in extending sss practices among their supplier network on the basis of telephone interviews and company data the thesis analyses the social sustainability efforts of the otto group the second largest online retailer in the world the two methods to monitor suppliers compliance that are examined in this thesis are assessment and collaboration results show that multinationals should not rely on either one of these two monitoring methods but should combine them using assessment only as first step and collaboration as second since assessment usually provides the buyer solely with a snapshot of the current situation at suppliers site collaboration as second step provides the relationship with a more mutual character frequent non compliance of parties the

buyer and the supplier emphasise that collaboration and therefore mutual controlling processes are necessary in case the business relationship between buyer and supplier does involve operations in risky low regulated countries these findings are even more highlighted
