this is the first book to address the social organisation of modern yoga practice as a primary focus of investigation and to undertake a comparative analysis to explore why certain styles of yoga have successfully transcended geographical boundaries and endured over time whilst others have dwindled and failed using fresh empirical data of the different ways in which posture practice was disseminated transnationally by Krishnamacharya Sivananda and their leading disciples the book provides an original perspective the author draws upon extensive archival research and numerous fieldwork interviews in India and the UK to consider how the field of yoga we experience today was shaped by historic decisions about how it was transmitted the book examines the specific ways in which a small group of yogis organised their practices and practitioners to popularise their styles of yoga to mainstream audiences outside of India it suggests that one of the most overlooked contributions has been that of Sivananda Saraswati 1887-1963 for whom this study finds his early example acted as a cornerstone for the growth of posture practice outlining how yoga practice is organised today on the world stage how leading brands fit into the wider field of modern yoga practice and how historical developments led to a mainstream globalised practice this book will be of interest to researchers in the field of yoga studies religious studies Hindu studies South Asian history sociology and organisational studies
