searching for dark matter with cosmic gamma rays summarizes the evidence for dark matter and what we can learn about its particle nature using cosmic gamma rays it has almost been 100 years since fritz zwicky first detected hints that most of the matter in the universe that doesn't directly emit or reflect light since then the observational evidence for dark matter has continued to grow dark matter may be a new kind of particle that is governed by physics beyond our standard model of particle physics in many models dark matter annihilation or decay produces gamma rays there are a variety of instruments observing the gamma ray sky from tens of mev to hundreds of tev some make deep focused observations of small regions while others provide coverage of the entire sky each experiment offers complementary sensitivity to dark matter searches in a variety of target sizes locations and dark matter mass scales we review results from recent gamma ray experiments including anomalies some have attributed to dark matter we also discuss how our gamma ray observations complement other dark matter searches and the prospects for future experiments

at long last james madison has his memorial on capitol hill and in this grand library building as the bicentennial of the framing of our constitution approaches here we provide monumental evidence that our nation has not forgotten the chief architect and advocate of our still vital constitution historians will probably agree that james madison was less effective as a politician than as a statesman a scholar and a political philosopher if the politician must have his eye on the next election and the statesman on the next generation this library invigorated by the quiet scholarly spirit of madison can remind us of the vistas of the past and future generations foreword
