the oil industry provides the lifeblood of modern civilization and bestselling books have been written about the industry and even individual companies in it like exxonmobil but the modern oil industry is an amazingly shady meeting ground of fixers gangsters dictators competing governments and multinational corporations and until now no book has set out to tell the story of this largely hidden world the global fleet of some 11 000 tankers that s tripled during the past decade moves approximately 2 billion metric tons of oil annually and every stage of the route from discovery to consumption is tainted by corruption and violence even if little of that is visible to the public based on trips to new york washington houston london paris geneva phnom penh dakar lagos baku and moscow among other far flung locals the secret world of oil includes up close portraits of a shadowy baku based trader a high flying london fixer and an oil dictator s playboy son who has to choose one of his eleven luxury vehicles when he heads out to party in los angeles supported by funding from the prestigious open society this is both an entertaining global travelogue and a major work of investigative reporting

scientist charles darwin discretely opened the possibility of a purely animalistic origin for the human species he repeatedly insisted that the differences between humans and others were a question of degree only sciences were however taken in the opposite direction where these

differences cannot have been generated by the natural processes of biological evolution in the animal in the secret world of darwin author michel bergeron discusses the effects on the sciences caused by the presence of questions on humanity only answerable with religious beliefs his investigation suggests that significant elements of perceived humanity have remained sufficiently narrowly defined to continue to agree with religious beliefs over the entire period starting with the scientific revolution centuries ago and reaching the present instead he questions could we be the simple animal who can only live on the belief not to be a simple animal to alleviate these biases on the sciences of life bergeron advocates a different synthesis between darwinism and lamarckism he further asks how can sciences pretend to a cosmology neutral in term of religious influence since all of its complex mathematical developments were made under the constraint that we can link the present directly to the big bang
