since its original publication in 1952 fosdick s book has been the single most reliable treatment of one of the most important philanthropies in the united states and indeed the world fosdick served as president of the foundation for twelve years from 1936 to 1948

when it was the largest grant making endowment in the world as Steven Wheatley notes in his valuable new introduction in part the story of the Rockefeller Foundation was intended as an instrument of institutional self defense when it was written the foundation community was under mounting political attack from the right and the book was meant to help balance the scales by cataloging the foundation's good works as a deliberate self portrait the book conceals as much as it reveals while in the process it reveals a good deal about the author Fosdick sees politics like bureaucracy as perhaps an avoidable problem and not an inevitable consequence of foundation activity he sees foundations as engaging in the application of scientific technical and organizational solutions to public problems through a venture capital approach to discovering how to resolve them Fosdick's higher ground approach became established philanthropic practice far beyond the Rockefeller Foundation consequently this volume is significant as an institutional history as well as a charter for American foundations

this is the story of an American dynasty it is the story of the father who built the fortune of the son who cleansed the name of the brothers who manipulated both the name and the fortune to their own ends and of the cousins who often wish they had inherited neither
