volume vii of the history of the university of oxford completes the survey of nineteenth century oxford begun in volume vi after 1871 both teachers and students at oxford were freed from tests of religious belief the volume describes the changed mental climate in which some dons sought a new basis for morality while many undergraduates found a compelling ideal in the ethic of public service both at home and in the empire as the existing colleges were revitalized and new ones founded the academic profession in oxford developed a peculiarly local form centred upon college tutors who stood in somewhat uneasy relation with the university's professors the various disciplines which came to form the undergraduate curriculum in both the arts and sciences are subject to major reappraisal and oxford's hidden curriculum is explored through accounts of student life and institutions including organized sport and the oxford union new light is shed on the social origins and previous schooling of undergraduates a fresh assessment is made of the movement to establish women's higher education in oxford and the strategies adopted by its promoters to implant communities for women within the masculine culture of an ancient university other widened horizons are traced in accounts of the university's engagement with imperial expansion social reform and the educational aspirations of the labour movement as well as the transformation of its press into a major international publisher the architectural developments considerable in quantity and highly varied in quality receive critical appraisal in a comprehensive survey of the whole period covered by volumes vi and vii 1800 1914 by the early twentieth century the challenges of socialism and democracy together with the demand for national efficiency gave rise to a renewed campaign to address issues such as promoting research abolishing compulsory greek and more generally broadening access to the university under the terrible test of the first world war still more deep seated concerns were raised about the side effects of oxford's educational practices and the volume concludes with some reflections on the directions which the university had taken over the previous fifty years series blurb no private institutions have exerted so profound an influence on national life over the centuries as the universities of oxford and cambridge few universities in the world have matched their intellectual distinction and none has evolved and maintained over so long a period a strictly comparable collegiate structure now a completely new and full scale history of the university of oxford from its obscure origins in the twelfth century until the late twentieth century has been produced by the university with the active support of its constituent colleges drawing on extensive original research as well as on the centuries old tradition of the study of the rich source material the history is altogether comprehensive appearing in eight chronologically arranged volumes together the volumes constitute a coherent overall study yet each has a unity of its own under individual editorship and brings together the work of leading scholars in the history of every university discipline and of its social institutional economic and political development as well as its impact on national and international life the result is a history not only more authoritative than any previously produced for oxford but more ambitious than any undertaken for any other european university and certain to endure for many generations to come

this fresh and readable account gives a complete history of the university of oxford from its beginnings in the eleventh century to the present day written by one of the leading authorities on the history of universities internationally it traces oxford's improbable rise from provincial backwater to one of the world's leading centres of research and teaching laurence brockliss sees oxford's history as one of discontinuity as much as continuity describing it in four distinct parts first he explores oxford as the catholic university in the centuries before the reformation when it was principally a clerical studium serving the needs of the western church then as the anglican university in the years from 1534 to 1845 when oxford was confessionally closed to other religions it trained the next generation of ministers of the church of england and acted as a finishing school for the sons of the gentry and the well to do after 1845 the imperial university saw the emergence over the following century of a new oxford a university which was still elitist but now non confessional became open to women as well as men took students from all round the empire and was held together at least until 1914 by a novel concept of christian service the final part the world university takes the story forward from 1945 to the present day and describes oxford's development as a modern meritocratic and secular university with an ever growing commitment to high quality academic research throughout the book oxford's history is placed in the wider context of the history of higher education in the uk europe and the world this helps to show how singular oxford's evolution has been a story not of entitlement but of hard work difficult decisions and a creative use of limited resources and advantages to keep its destiny in its own hands
