this book offers a critical introduction to the work of american philosopher d g leahy 1937-2014 leahy's fundamental thinking can be characterized as an absolute creativity in which all creating is live a happening occurring now that manifests a supersaturated polyontological actuality that is essentially created by the logic that characterizes it leahy leaves behind the categorial presuppositions of modern thought eclipsing both cartesian and hegelian subjectivities and introducing instead an essentially new form of thinking founded in a nondual logic of creation the new thinking delineates the absolute unicity of existence as a creative interactivity beyond all traditional dichotomies such as one vs many unity vs plurality identity vs change a fully digitized actuality that is nothing but newness which inherently implies nothing but change through this new form of thinking change itself is revealed to be the very essence of reality and mind any reader looking for a quantum leap beyond the thrall of modern and postmodern fixations is invited to hear and apprehend this new thinking that refuses to be conditioned by paradigms categories species genera walls bridges boundaries or abstractions an essentially free thinking that embodies creative novelty itself

earthquake and the invention of america the making of elsewhere catastrophe explores the role of earthquakes in shaping the deep timeframes and multi hemispheric geographies of american literary history spanning the ancient world to the futuristic continents of speculative fiction the earthquake stories assembled here together reveal the emergence of a broadly western cultural syndrome that became an acute national fantasy elsewhere catastrophe an unspoken but widely prevalent sense that catastrophe is somehow un-american catastrophe must be elsewhere because it affirms the rightness of here where conquest according to the syndrome's logic did not happen and is not occurring the psychic investment in elsewhere catastrophe coalesced slowly across centuries varieties of it can be found in various european traditions of the modern yet in its most striking modes and resonances elsewhere catastrophe proves fundamental to

the invention of us america which is why earthquake as the exemplary elsewhere catastrophe is the disaster that must always happen far away or be forgotten the book's eight chapters and epilogue range from plato to the puritans from el inca garcilaso de la vega and voltaire to herman melville and n k jemisin examining along the way the seismic imaginings of edgar allan poe james fenimore cooper frederick douglass emily dickinson and jose martí among other writers at the core of the book's inquiries are the earthquakes historical and imagined that act as both a recurrent eruptive force and a provocation for disparate modes of critical engagement with the long and catastrophic history of the americas
