this unique memoir charts the career of the author in the royal navy submarine service during the period 1967 to 1997 and in doing so details many of the silent service's remarkable achievements since the end of the second world war and it provides a dramatic first hand account of the underwater confrontation during the cold war between submarines of the west and the huge submarine force of the soviet union dan conley narrates the successive stages from his basic submarine training to taking command of two nuclear attack submarines but he does not demur from describing the personal and professional difficulties he encountered in this journey he sets out in detail what life was like serving onboard both diesel and nuclear submarines and in particular the book describes the british submariner's remarkable transformation from the somewhat buccaneering free spirit serving on a clapped out ww2 boat during the sunset of the british empire to the highly professional individual who spends prolonged periods under the sea in a platform which matches the complexity of a space craft the book describes the long and difficult challenges encountered in developing effective weapon systems for the british submarine force and discusses the difficulties and shortcomings in the uk's defense procurement system a situation which still exists today ultimately however western technological superiority and crew proficiency enabled the submarines of the royal and united states navies to match those of the soviet union and he describes vividly the suspense and tension of underwater confrontations which might so easily have escalated to another dimension of warfare and the book sets out hitherto undisclosed details of submarine activities during the 1962 cuban missile crisis when the world confronted the real possibility of a massive nuclear exchange but it is not all serious content and he also offers a glimpse for the reader of many humorous situations and events of animals that found themselves under the sea in a submarine in
