Dans un passé assez récent, un intérêt sans précédent s'est développé concernant les ressources globales. Nous nous rendons maintenant compte que les ressources biologiques sont loin d'être illimitées et pendant les dernières décennies du 20^{ème} siècle, des efforts ont débuté pour contrôler nos usages de l'environnement et qui agissent les uns avec les autres dans les écosystèmes dont nous dépendons finalement. Le projet Mers au millénaire, une évaluation environnementale sur la zone côtière, couvre le secteur où vit plus d'un quart de l'humanité et jusque au bas du plateau continental. Ces trois livres se concentrent sur la biosphère où les interactions de l'homme avec les mers et leurs systèmes biologiques et physiques sont le plus sensibles. 135 chapitres écrits par les experts internationaux et les scientifiques travaillant dans ce domaine offrent un sommaire unique des mers et des océans du monde. À la fin du millénaire, les auteurs à travers le monde ont examiné l'état de nos habitats marins et côtiers pour la première fois. Ils ont uni leurs efforts de par le monde pour s'assurer que ces habitats restent dans un état de fonctionnement durable et stable. L'information a été documentée et assemblée dans une source bibliographique unique. Mers au millénaire fournit aux scientifiques dans le monde entier une occasion unique pour s'enrichir de toutes ces expériences. Les trois volumes de Mers au millénaire couvrent des chapitres d'importance globale et régionale comme la description biologique des eaux côtières et du plateau continental, le développement et l'utilisation de la zone côtière, les effets des dragages et autres techniques d'accrétion sédimentaire, l'effet dans le temps des déversements de polluants, la pêche, les méthodes et techniques de gestion utilisées pour gérer en continu les écosystèmes, plus de 800 figures comprenant des cartes, les graphiques, les dessins au trait et les photographies.
