this update to the award winning the origins of modern humans a world survey of the fossil evidence covers the most accepted common theories concerning the emergence of modern homo sapiens adding fresh insight from top young scholars on the key new discoveries of the past 25 years the origins of modern humans biology reconsidered allows field leaders to discuss and assess the assemblage of hominid fossil material in each region of the world during the pleistocene epoch it features new fossil and molecular evidence such as the evolutionary inferences drawn from assessments of modern humans and large segments of the neandertal genome it also addresses the impact of digital imagery and the more sophisticated morphometrics that have entered the analytical fray since 1984 beginning with a thoughtful introduction by the authors on modern human origins the book offers such insightful chapter contributions as africa the cradle of modern people crossroads of the old world late hominin evolution in western asia a river runs through it modern human origins in east asia perspectives on the origins of modern australians modern human origins in central europe the makers of the early upper paleolithic in western eurasia neandertal craniofacial growth and development and its relevance for modern human origins energetics and the origin of modern humans understanding human cranial variation in light of modern human origins the relevance of archaic genomes to modern human origins the process of modern human origins the evolutionary and demographic changes giving rise to modern humans the paleobiology of modern human emergence elegant and thought

provoking the origins of modern humans biology reconsidered is an ideal read for students grad students and professionals in human evolution and paleoanthropology

michael witzel persuasively demonstrates the prehistoric origins of most of the mythologies of eurasia and the americas laurasia

in this fascinating book john maynard smith and eors szathmary present an original picture of evolution they propose that during evolution there have been a number of major transitions in the way in which information is passed between generations these transitions include the appearance of the first replicating molecules the emergence of co operative animal societies and the unique language ability of humans containing many new ideas this book is contemporary biology on the grandest scale from the birth of life to the origin of language

originally published in 1981 the origins of open field agriculture looks at the problems connected with open field agriculture the origins of strip cultivation the three field system the adaptation of celtic fields and the development of ploughing techniques the book looks at the challenges to traditional ideas on the origins of settlement and their associated economy and casts new light on understandings of village development the book suggests that conventional views of the nucleated village in the midst of open field strips as a product of the anglo saxon migration is no longer tenable the book brings together the work of distinguished archaeologists historians and historical geographers and opens up a new perspective on the early development of medieval agriculture

the origins of self explores the role that selfhood plays in defining human society and each human individual in that society it considers the genetic and cultural origins of self the role that self plays in socialisation and language and the types of self we generate in our individual journeys to and through adulthood edwardes argues that other awareness is a relatively early evolutionary development present throughout the primate clade and perhaps beyond but self awareness is a product of the sharing of social models something only humans appear to do the self of which we are aware is not something innate within us it is a model of our self produced as a response to the models of us offered to us by other people edwardes proposes that human construction of selfhood involves seven different types of self all but one of them are internally generated models and the only non model the actual self is completely hidden from conscious awareness we rely on others to tell us about our self and even to let us know we are a self

offers a new insight into the arguments of nature versus nurture by showing that many of the assumptions on both sides are false re examines evidence about the nature of genes evolution and the nature of the environment in the development of cognitive ability

this edited volume builds and expands on the groundbreaking work of robert brenner and ellen meiksins wood on the origins of capitalism whereas brenner and wood focused mostly on the emergence of capitalism in the english countryside agrarian capitalism this book utilizes their approach to offer original theoretically sophisticated and empirically informed accounts of transitions to capitalism both agrarian and industrial in a wide range of countries in order to provide within a single volume a diverse collection of relatively brief yet detailed case studies of the historical transition to capitalism distributed across three continents offering a new and highly original analysis of the global spread of capitalism this book will be a unique contribution to the longstanding debate on the transition to capitalism

this volume offers a new interpretation of the genesis of the idea of scientific progress in early modern science and philosophy the interpretation argues that the idea of scientific progress was not a historical category but an epistemological one the main thesis of the book posits that the idea of scientific progress was a methodological means of dealing with the contingency of nature to illustrate the novelty of the idea the individual chapters compare several features of renaissance natural philosophy with a new regime of knowledge that included time as an inevitable factor of empirical research the temporal regime of knowledge is illustrated by the work of bernard de fontenelle and his colleagues at the académie des sciences in paris at the end of the 17th century the new interpretation remedies a gap in recent scholarship where the idea of scientific progress has been overlooked even though the early modern natural philosophers themselves used it to describe the nature of their research the book places both well known texts and less studied documents in a new light thus contributing to the lively and rich debate on the origins and nature of early modern science and philosophy it is of interest to scholars studying the history of early modern philosophy and science

an analysis of the origin of the canons of hippolytus church orders from the fourth century can a case still be made for egyptian origin of the canons of hippolytus this is the question that noted scholars maxwell e johnson and nathan p chase focus on in response to the recent translation of and commentary on the canons of hippolytus by alistair stewart who claims a cappadocian origin with a possibly later egyptian redaction in the origins of the canons of hippolytus the authors look at the relevant canons and argue for an egyptian origin though not necessarily alexandrian for students and teachers of liturgy theology and the early church this volume provides contemporary research and careful analysis on the origin and relevance of the canons of hippolytus supporting the claim that they remain the earliest derivative document of the apostolic tradition

this is a concise but wide ranging account of all aspects of the scientific revolution from astronomy to zoology the third edition has been thoroughly updated and some sections revised and extended to take into account the latest scholarship and research and new developments in historiography

darius i king of persia claims to have accomplished many deeds in the early years of his reign but was one of them the rebuilding of the temple in jerusalem the editor who added the date to the books of haggai and zechariah thought so and the author of ezra 1 6 then relied on his dates when writing his account of the rebuilding process the genealogical information contained in the book of nehemiah however suggests otherwise it indicates that zerubbabel and nehemiah were either contemporaries or a generation apart in age not some 65 years apart thus either zerubbabel and the temple rebuilding needs to be moved to the reign of artaxerxes i or nehemiah and the rebuilding of the city walls needs to be moved to the reign of darius i in this ground breaking volume the argument is made that the temple was built during the reign of artaxerxes i the editor of haggai and zechariah mistakenly set the event under darius i because he was influenced by both a desire to show the fulfillment of inherited prophecy and by darius widely circulated autobiography of his rise to power in light of the settlement patterns in yehud during the persian period it is proposed that artaxerxes i instituted a master plan to incorporate yehud into the persian road postal and military systems the rebuilding of the temple was a minor part of the larger plan that provided soldiers stationed in the fortress in jerusalem and civilians living in the new provincial seat with a place to worship their native god while also providing a place to store taxes and monies collected on behalf of the persian administration

the origins of capitalism can be found in the middle ages

this work fills a gap in recent studies on the history of race and science focusing on both the classification systems of human variety and the development of science as the arbiter of truth brown looks at the rise of the emerging sciences of life and society biology and sociology as well as the debate surrounding slavery and abolition

understanding life through its origins reveals the groundwork underlying the differentiations of its autonomous generative matrixes following the primogenital matrix of generation the three generative matrixes of the specifically human sense of life establish humanness within the creative human condition as the existential sphere of sharing in life

christmas exerts an enormous attraction today even apart from its christian character as a celebration of the incarnation of god in the person of jesus even marginal or indifferent christians crowd the churches on christmas eve and in highly commercialized and technologized western societies the christmas season is celebrated with enthousiasm yet christmas entered the calendar of feasts relatively late by 336 c e and the reason for its introduction and quick spread remain speculative and based on fragmentary evidence towards the origins of christmas addresses both the contemporary western celebration of christmas and its deep historical roots in the church of the fourth century the book presents a thorough investigation of the patristic texts and evidence cited by liturgical scholars in the late 19th and 20th centuries to support two main theories the calculation theory and the history of religions theory this historical research is set in the framework of the contemporary experience of christmas the dynamics of time and the liturgical year the inculturation of liturgy and underlying elements of dualism and patriarchal power paradigms which linger beneath the often commercial and sentimental character of christmas today suzan k roll was born in clarence center new york usa in 1952 she holds degrees in classical languages and pastoral theology and in 1993 received a ph d from the faculty of theology of the catholic university of louvain leuven belgium summa cum laude with the gratulations of the jury she has thaught and published in the field of liturgy sacraments pastoral theology and presently teaches at christ the king seminary buffalo new york usa

debate rages within the catholic church about the ethics of war and peace but the simple question of why wars begin is too often neglected catholics assumptions about the causes of conflict are almost always drawn uncritically from international relations theory a field dominated by liberalism realism and marxism which is not always consistent with catholic theology in the origins of war matthew a shadle examines several sources to better understand why war happens his retrieval of biblical literature and the teachings of figures from church tradition sets the course for the book shadle then explores the growing awareness of historical consciousness within the catholic tradition the way beliefs and actions are shaped by time place and culture he examines the work of contemporary catholic thinkers like pope john paul ii jacques maritain john courtney murray dorothy day brian hehir and george weigel in the constructive part of the book shadle analyzes the movement within international relations theory known as constructivism which proposes that war is largely governed by a set of socially constructed and cultural influences constructivism shadle claims presents a way of interpreting international politics that is highly amenable to a catholic worldview and can provide a new direction for the christian

vocation of peacemaking

a groundbreaking new study that utilizes archaeological discoveries and ancient texts to revolutionize our understanding of the beginnings of judaism throughout much of history the jewish way of life has been characterized by strict adherence to the practices and prohibitions legislated by the torah dietary laws ritual purity circumcision sabbath regulations holidays and more but precisely when did this unique way of life first emerge and why specifically at that time in this revolutionary new study yonatan adler methodically engages ancient texts and archaeological discoveries to reveal the earliest evidence of torah observance among ordinary judeans he examines the species of animal bones in ancient rubbish heaps the prevalence of purification pools and chalk vessels in judean settlements the dating of figural representations in decorative and functional arts evidence of such practices as tefillin and mezuzot and much more to reconstruct when ancient judean society first adopted the torah as authoritative law focusing on the lived experience of the earliest torah observers this investigative study transforms much of what we thought we knew about the genesis and early development of judaism
