our nation began with the simple phrase we the people but who were and are we who were we in 1776 in 1865 or 1968 and is there any continuity in character between the we of those years and the nearly 300 million people living in the radically different america of today with made in america claudia s fischer draws on decades of historical psychological and social research to answer that question by tracking the evolution of american character and culture over three centuries he explodes myths such as that contemporary americans are more mobile and less religious than their ancestors or that they are more focused on money and consumption and reveals instead how greater security and wealth have only reinforced the independence egalitarianism and commitment to community that characterized our people from the earliest years skillfully drawing on personal stories of representative americans fischer shows that affluence and social progress have allowed more people to participate fully in cultural and political life thus broadening the category of american yet at the same time what it means to be an american has retained surprising continuity with much earlier notions of american character firmly in the vein of such classics as the lonely crowd and habits of the heart yet challenging many of their conclusions made in america takes readers beyond the simplicity of headlines and the actions of elites to show us the lives aspirations and emotions of ordinary americans from the settling of the colonies to the settling of the suburbs
