scruton argues that the tragedies and disasters of the history of the european continent have been the consequences of a false optimism and the fallacies that derive from it in place of these fallacies scruton mounts a passionate defence of both civil society and freedom he shows that the true legacy of european civilisation is not the false idealisms that have almost destroyed it in the shapes of nazism fascism and communism but the culture of forgiveness and irony which we must now protect from those whom it offends the uses of pessimism is a passionate plea for reason and responsibility written at a time of profound change

ranging widely over human history and culture from ancient greece to the current global economic downturn scruton makes a counterintuitive yet persuasive case that optimists and idealists with their ignorance about the truths of human nature and human society and their naive

hopes about what can be changed have wrought havoc for centuries scruton s argument is nuanced however and his preference for pessimism is not a dark view of human nature rather his is a hopeful pessimism which urges that instead of utopian efforts to reform human society or human nature we focus on the only reform that we can truly master the improvement of ourselves through the cultivation of our better instincts written in scruton s trademark style erudite sweeping in scope across centuries and cultures and unafraid to offend this book is sure to intrigue and provoke readers concerned with the state of western culture the nature of human beings and the question of whether social progress is truly possible

a detailed account of nietzsche s critique of pessimism is elucidated in its appropriate historical context disentangling its various strands

this book presents an original worldview homo risibilis wherein self referential humor is proposed as the path leading from a tragic view of life to a liberating embrace of human ridicule humor is presented as a conceptual tool for holding together contradictions and managing the unresolvable conflict of the human condition till homo risibilis resolves the inherent tension without epistemological cost this original approach to the human condition allows us to effectively address life s ambiguities without losing sight of its tragic overtones and brings along far ranging personal and social benefits by defining the problem that other philosophies and many religions attempt to solve in terms we can all relate to homo risibilis enables an understanding of the other that surpasses mere tolerance its egalitarian vision roots an ethic of compassion without requiring metaphysical or religious assumptions and liberates the individual for action on others behalf it offers a new model of rationality which effectively handles and eventually resolves the tension between oneself others and the world at large amir s view of the human condition transcends the field of philosophy of humor an original worldview that fits the requirements of traditional philosophy homo risibilis is especially apt to answer contemporary concerns it embodies the minimal consensus we need in order to live together and the active role philosophy should responsibly play in a global world here developed for the first time in a complete way the homo risibilis worldview is not only liberating in nature but also illuminates the shortcomings of other philosophies in their attempts to secure harmony in a disharmonious world for a disharmonious human being

this book argues that philosophical pessimism can offer vital impulses for contemporary cultural studies pessimist thought offers ways to interrogate notions of temporality progress and futurity when the horizon of future expectation is increasingly shaped by the prospect of apocalypse and extinction an exploration of pessimist thought can help to make sense of an increasingly complex and uncertain world by affirming rather than suppressing the worst this book argues that a cultural logic of the worst is at work in a substantial section of contemporary philosophical thought and cultural representations spectres of pessimism can be found in contemporary ecocritical thought antinatalist philosophies political thought and cultural theory as well as in literature film and popular music in its unsettling of temporality this new pessimism shares sensibilities with the field of hauntology both deconstruct linear narratives of time that adhere to a stable sequence of past present and future mark schmitt therefore couples pessimism and hauntology to explore the spectres of pessimism in a range of theories and narratives from ecocriticism antinatalism and queer theory to utopianism from afropessimism to the fiction of hari kunzru and thomas ligotti to the films of camille griffin gaspar no   denis villeneuve and lars

this book traces the emergence of modern pessimism in nineteenth century france and examines its aesthetic epistemological ethical and political implications it explores how since pessimism as a worldview is not empirically verifiable writers on pessimism shift the discussion to verisimilitude opening up rich territory for cross fertilization between philosophy and literature the book traces debates on pessimism in the nineteenth century among french nonfiction writers who either lauded its promotion of compassion or condemned it for being a sick and unliveable attempt at renunciation it then examines the way novelists and poets take up and transform these questions by portraying characters in lived situations that serve as testing grounds for the merits or limitations of pessimism the debate on pessimism that emerged in the nineteenth century is still very much with us and this book offers an interhistorical argument for embracing pessimism as a way of living well in the world aesthetically ethically and politically

explores the emphasis that contemporary novels films and television series place on the present arguing that hope emerges from the potentiality of the here and now rather than the future and as intimately entangled with negotiations of structures of belonging taking its cue from an understanding of hope as connoting an organizing temporality one which is often presumed to be projecting into a future hope and kinship in contemporary fiction challenges this understanding arguing that hope emerges in practices of relationality in the present disentangling hope from a necessary correlation with futurity through close readings of contemporary works including the road the walking dead cloud atlas sense8 the people in the trees and a little life gero bauer

investigates how these texts explore structures of kinship as creative and affective practices of belonging and care that claim spaces beyond the heterosexual reproductive nuclear family in this context fictional figurations of the child often considered the bearer of the future are of particular interest through these interventions into definitions of and reflections on fictional manifestations of hope and kinship bauer s analyses intersect with queer theory new materialism and postcritical approaches to literature and cultural studies moving towards counterintuitively hopeful readings of the present moment
