nicholas d smith presents an original interpretation of the republic considering it to be a book about knowledge and education over the course of summoning knowledge in plato s republic he argues for four main theses firstly the republic is not just a work that has a lot to say about education it is a book that depicts socrates as attempting to engage his interlocutors in such a way as to help to educate them and also engages us the readers in a way that helps to educate us secondly plato does not suppose that education properly understood should have as its primary aim putting knowledge into souls that do not already have it instead the education plato discusses represents occurring between socrates and his interlocutors and hopes to achieve in his readers is one that aims to arouse the power of knowledge in us and then to begin to train that power always to engage with what is more real rather than what is less real thirdly plato s conception of knowledge is not the one typically presented in contemporary epistemology it is rather the power of conceptualization by the use of exemplars and finally plato engages this power of knowledge in the republic in a way he represents as only a kind of second best way to engage knowledge and not as the best way which would be dialectic instead plato uses images that summon the power of knowledge to begin the process by which the power may become fully realized
