in this study i adopted a combined individual and sociocultural perspective on learning in order to investigate small group discussions in an inquiry based middle school science classroom the specific purpose of the study was to answer the following research questions a how can we classify students sense making statements b to what extent do students engage in sense making discussion smd and c which factors provide support for students smd to answer these questions two groups were

videotaped during the interactions and motion unit from the constructing ideas in physical science middle school curriculum to classify students sense making statements i developed a six component framework for sense making discussion my six components of sense making discussion are predicting a phenomenon or experimental outcome clarifying the facts of a phenomenon or experimental result describing and explaining a phenomenon or experimental result defining describing clarifying and connecting scientific concepts procedures processes and representations testing knowledge compatibility and making a request for any of the above the extent of students sense making discussions was established by a documenting instances of student sense making according to the six component scheme and then forming distributions of sense making instances and b calculating the percentage of time that groups dedicated to sense making discussion to determine the influence that various factors have on students sense making discussions i first drew on the research in collaboration discourse and nonverbal sense making to arrive at an initial list of personal group task and contextual factors that would likely influence the smd in this study i then picked out significant quantitative differences in sense making between groups students and different portions of the curriculum cycles sub sections etc and determined to what extent the initial list of factors contributed to the significant differences in smd and also to what extent any additional factors contributed to these differences my analysis showed that many of the factors from the initial list helped to explain the differences in sense making i also identified six other factors that contributed to these differences capacity for intra group guidance intellectual capacity time available for sense making external guidance awareness of the curriculum structure and an awareness and valuing of the curriculum goals
