for many centuries the history of the crusades as written by western historians was based solidly on western sources evidence from the islamic societies that the crusaders attacked was used only sparingly in part because it was hard for most westerners to read and in part because much of it was inaccessible even for historians who did speak arabic carole hillenbrand set out to re evaluate the sources for the crusading period not only looking with fresh eyes at known accounts but also locating and utilizing new sources that had previously been overlooked her work involved her in conducting extensive evaluations of the new sources assessing their

arguments their evidence and their reasoning in order to assess their value and using the critical thinking skill of analysis a powerful method for understanding how arguments are built to place them correctly in the context of crusade studies as a whole the result is not only a history that is more balanced better argued and more adequate than most that have gone before it but also a work with relevance for today at a time when crusading imagery and mentions of the current war on terror as a crusade help to fuel political narrative hillenbrand's evaluative work acts as an important corrective to oversimplification and misrepresentation

at the 900th anniversary of the crusader capture of jerusalem it is timely to reflect on how the phenomenon of the crusades influenced the muslim world then and now militarily culturally and psychologically this book discusses a group of themes designed to highlight how muslims reacted to the alien presence of the crusaders in the heart of traditional muslim territory ideological concerns are examined and the importance of the jihad is assessed in the context of the gradual recovery of the holy land and the expulsion of the crusaders two chapters are devoted to an analysis of warfare arms battles sieges fortifications on the basis of written sources and extant works of art and the neglected aspect of the navy is brought into prominence one chapter deals with the complex issue of the interaction between muslims and crusaders in a social economic and cultural setting the epilogue traces in outline the

profound impact of the crusades on muslim consciousness until the present day this is not a chronological survey of the events of the period 1099 to 1291 and even beyond for that has already been done several times instead this is a general book intended to introduce some of the wider aspects of the history of the crusades from the muslim side accordingly as a deliberate policy an attempt is made here to view the phenomenon of the crusades entirely through the prism of medieval muslim sources this naturally involves bias but such a bias is salutary given the cumulative impact of centuries of eurocentric scholarship in this field and it should help to create a more balanced picture of this fascinating and momentous period of christian muslim confrontation and interaction

the crusades continue to exert a fascination in the west as a story of perceived gallantry and battles against impossible odds yet what is less often considered is their effect on the holy land and in particular the response of the muslim world to the invasions of european crusaders in this book w b bartlett author of four books on the crusades looks at these great events from the muslim point of view one of the effects was to unite a previously divided islamic world against a common enemy in the process they gave an unstoppable impetus towards the declaring of jihad against the west a holy war against christendom they also helped to shape the careers of some important figures most notably saladin but also other great men like sultan baibars and nur al din the rise of these great leaders is traced in this book as are the many great battles that were fought by men just as devoted to their cause as the crusaders were

seminar paper from the year 2010 in the subject politics topic peace and conflict security grade 10 east tennessee state university history department course origins of problems in the middle east language english abstract in september 2001 shortly after the terrorist attacks on america president george w bush announced his crusade against terrorism a crusade that was aimed mainly at islamic fundamentalists one millennium after the first crusades that conflict seemed still going on and the connection to that fateful day in september 2001 was drawn easily the fight had been going on since the first expansion of islam into the former christian world an everlasting conflict between christians in the west and muslims in the east seems so obvious that we take it for self evident when we perceive our political world authors have written and modified it repeatedly not long ago bernard lewis wrote his islam and the west telling us about the history of these cultures as a history of military conflict one more famous book takes that approach to take a look at the recent development in world politics and predict its clash of civilizations huntington shows the post cold war world by explaining global politics along cultural lines one of the most important of these lines is not surprisingly the one between the islamic and the western civilizations but what if we take a closer look on what appears to be behind the ambiguous history of crusades and holy wars are there perhaps more sophisticated explanations we have to differentiate the motives for the main campaigns in an assumed continuous conflict therefore we will see over the crusades the fierce war at the front between christendom and islam under ottoman rule and finally the modern antagonisms to verify or falsify that theory of a causally determined cultural conflict

the first great city the crusaders came to in 1089 was not jerusalem but constantinople the capital of the byzantine empire almost as much as jerusalem itself constantinople was the key to the foundation survival and ultimate eclipse of the crusading kingdom the byzantines had developed an ideology over seven hundred years which placed constantinople rather than rome or jerusalem at the centre of the world the attitudes of its rulers reflected this priority and led to tensions with the crusaders over military and diplomatic strategy at the same time the riches and sophistication of the great city made a lasting impression on the crusaders even though they found byzantine society alien and remote in the end the lure of the city's wealth was irresistibly fatal to the claims of christian unity in 1204 the fourth crusade under the venetian doge enrico dandolo captured and sacked constantinople signalling the effective end of almost a thousand years of byzantine dominance in the east
