an accessible and highly readable introduction to the sociology of health and illness through the inclusion of key theorists concepts and theories with reference to

contemporary health concerns and recent relevant research kylie baldwin de montfort university guides us through the many reasons for the centrality of health showing clearly that health and illness are the products not just of our biology but of the society into which we are born an authoritative analysis of the social nature of health ray fitzpatrick university of oxford this bestselling text introduces students to the core principles of the sociology of health demonstrating the relationship between social structures and the production and distribution of health and disease in modern society written with a truly sociological and critical perspective the book tackles themes such as class gender and ethnicity and engages with a range of theories and theorists including foucault fleck parsons weber and kuhn the third edition has been thoroughly updated to include the latest cutting edge thinking in the area with new empirical examples updated references and new sections on thought styles after fleck and transformations of the medical profession it also uses helpful learning features including chapter overviews case studies summaries and further reading suggestions to provide stimulating and thought provoking exercises for students in health nursing and sociology schools

interprofessional teams of health and social care professionals encounter and respond to significant ethical challenges and complexity in their everyday work this scenario based book explores how to enact ethical values and virtues while working across the four pillars of professional activity practice education leadership and research effective responses to care needs and everyday complexity require teamwork and a holistic approach to individual family and community needs they require health and social care professionals having an in depth appreciation of their own professional roles responsibilities and contributions as well as those of other professions this book enables readers to engage with and reflect on a range of ethical decision making situations that can occur across the lifecourse and impact interprofessional teams each chapter is based around particular authentic scenarios derived from the experiences of care recipients and family members involved in the co production of the book and taking place in a range of care contexts from maternity care to community from hospital to residential care and from accident and emergency areas to hospice introducing and discussing interprofessional issues from an ethical stance this is an essential text for health and social care students and practitioners and a resource for interprofessional ipe facilitators with a commitment to ethics in health and social care practice research education and leadership

this groundbreaking book applies the concept of social determinants of health to the health of african american men while there have been significant efforts in recent years to eliminate health disparities serious disparities continue to exist especially with regard to african american men who continue to suffer disproportionately from poor health when compared to other racial ethnic and gender groups in the united states this book covers the most important issues relating to social determinants of health and also offers viable strategies for reducing health disparities

this edited volume aims to better understand the multifaceted phenomenon we call health going beyond simple views of health as the absence of disease or as complete

well being this book unites scientists and philosophers the contributions clarify the links between health and adaptation robustness resilience or dynamic homeostasis and discuss how to achieve health and healthy aging through practices such as hormesis the book is divided into three parts and a conclusion the first part explains health from within specific disciplines the second part explores health from the perspective of a bodily part system function or even the environment in which organisms live and the final part looks at more clinical or practical perspectives it thereby gathers across 30 chapters diverse perspectives from the broad fields of evolutionary and systems biology immunology and biogerontology more specific areas such as odontology cardiology neurology and public health as well as philosophical reflections on mental health sexuality authenticity and medical theories the overarching aim is to inform inspire and encourage intellectuals from various disciplines to assess whether explanations in these disparate fields and across biological levels can be sufficiently systematized and unified to clarify the complexity of health it will be particularly useful for medical graduates philosophy graduates and research professionals in the life sciences and general medicine as well as for upper level graduate philosophy of science students

a union list of serials commencing publication after dec 31 1949
