with this fully updated edition of the book pine and gilmore make an even stronger case that experience is the missing link between a company and its potential audience

bogen beskriver en samfundsudvikling hvor oplevelsesøkonomi er et symptom og et udtryk for denne udvikling

this illuminating handbook presents the state of the art in the scientific field of experience economy studies it offers a rich and varied collection of contributions that discuss different issues of crucial importance for our understanding of the exp

twenty years ago this seminal book on experience innovation by Joseph Pine and James Gilmore explored how savvy companies excel by offering compelling experiences for customers resulting not only in customer allegiance but also in a more profitable bottom line. Translated into more than fifteen languages, the *Experience Economy* has become a must read for leaders of enterprises large and small, for profit and nonprofit, global and local. In a brand new preface, Pine and Gilmore make an even stronger case for experiences as the critical link between a company and its potential audience. The authors take this enduring idea and broaden its application to the demands of today's increasingly distractible, time-starved world. Experiences and transformations are the basis for future business growth and prosperity, and the *Experience Economy* offers the script from which managers can continue to generate value in ways that are aligned with a strong customer-centric strategy.

Creating experiences in the *Experience Economy* focuses on the creation of experience from a business perspective. In doing so, the book establishes a more solid foundation for making better and more complex analyses of experience creation, paving the way for the development of analytically based and innovative experiences in experience firms and institutions. The contributors emphasize that experience creation is not an easy task with a straightforward formula and examine how marketed experiences are constructed, developed, and innovated, presenting diverse and innovative perspectives. The contributors discuss and present models for how experiences are designed, produced, and distributed with its cross-disciplinary approach to experience creation. This fascinating study will appeal to researchers and academics of business administration, services, culture, and tourism.

The *Experience Economy* is a fourth economic field, different from commodities, goods, and services. Experiences are an economic value added to a product or identical with the product. When you buy an experience, you pay to spend time enjoying a series of memorable events that a company stages to engage the customer in a personal way. The experience dimension has moved into a predominant place since the 1990s, fueled by an expanding global and digital economy. In developed countries, people get richer and more individualized, and having met all basic material needs, they focus increasingly on personal development and self-realization. Demand for experience-based products increases, such as tourism and sports, as well as film, music, and other contents of media and interactive technologies. Furthermore, the demand for experience values is extended to include any product and dimension of modern societies, such as the design of houses, furniture, clothes, cars, computers, etc. This is not a completely new story; commercial entertainment and design have been around for a century or so, and in addition, universal values of love, sex, belief, family, and the meaning of life have always been vital to human beings. What is new is the fact that capitalism is invading more and more fields of experiences connected with emotions and the extension of life proportions in all developed countries and increasingly on a global scale. A series of

expanding industries have emerged to supply the market with experience oriented goods in this book the business development of markets and industries is covered from tourism to media and entertainment and from design to sex including leading companies and trends in all industries involved
