why did science emerge in the west and how did scientific values come to be regarded as the yardstick for all other forms of knowledge stephen gaukroger shows just how bitterly the cognitive and cultural standing of science was contested in its early development rejecting the traditional picture of secularization he argues that science in the seventeenth century emerged not in opposition to religion but rather was in many respects driven by it moreover science did not present a unified picture of nature but was an unstable field of different often locally successful but just as often incompatible programmes to complicate matters much depended on attempts to reshape the persona of the natural philosopher and distinctive new notions of objectivity and impartiality were imported into natural philosophy changing its character radically by redefining the qualities of its practitioners the west's sense of itself its relation to its past and its sense of its future have been profoundly altered since the

seventeenth century as cognitive values generally have gradually come to be shaped around scientific ones science has not merely brought a new set of such values to the task of understanding the world and our place in it but rather has completely transformed the task redefining the goals of enquiry this distinctive feature of the development of a scientific culture in the west marks it out from other scientifically productive cultures in the emergence of a scientific culture stephen gaukroger offers a detailed and comprehensive account of the formative stages of this development and one which challenges the received wisdom that science was seen to be self evidently the correct path to knowledge and that the benefits of science were immediately obvious to the disinterested observer

in a scientist speaks out a personal perspective on science society and change nobel laureate chemistry 1951 glenn t seaborg shares some of his thoughts and reflections on his broad interests from the formulation of national science policy to the promise of youth during a distinguished career in science and public service that spanned more than 50 years he published over 500 works and maintained a public speaking schedule that included about 700 speeches on a wide variety of topics this volume is a collection of nearly forty of his more popular speeches and articles directed at a mostly non scientific and non technical audience since this volume is a compendium of reprints readers will be able to share some of seaborg s thoughts as he originally penned them

user friendly and concise this text dissects the whys of science and discovery the author has outstanding experience in mentoring science students and staff and also in outreach activities for the public and students of all ages including schools the final chapter emphasises the joys of the scientist in research

the bulletin of the atomic scientists is the premier public resource on scientific and technological developments that impact global security founded by manhattan project scientists the bulletin s iconic doomsday clock stimulates solutions for a safer world
