architecture is making its presence felt in cutting edge fashion the pliable metals membrane structures lightweight glasses and plastics used in building construction are creeping onto the catwalk as they do so their impact on recent textile developments has produced fabrics that enable clothing to act as individual climate controlled environments that can exchange information with embedded sensors resulting in wearable dwellings that act as both shelter and clothing at the same time architects are borrowing the techniques of pleating stapling cutting and draping from traditional tailoring to design buildings that are flexible interactive inflatable and even portable although the relationship between architecture and fashion was recognized more than a century ago the connection between them has rarely been explored by historians designers or practicing architects the fashion of architecture is the first attempt to investigate the contemporary relationship between architecture and fashion in considerable depth by examining the ideas imagery techniques and materials used by visionaries such as martin margiela issey miyake alexander

mcqueen tadao ando and daniel libeskind as mavericks ranging from hussein chalayan and rei kawakubo to rem koolhaas and zaha hadid describe architecture's role in the formation of fashion identities new readings of both areas emerge probing and far reaching in its content the fashion of architecture is the most comprehensive study of this exciting area to date

the architecture of the grose bradley studio springs from the canons of western functionalism but it translates them into structures that integrate with the australian environment and interpret its historical and natural characteristics as well as its way of life

while few historians would dispute the importance of the printed book in the development of domestic design in 18th and 19th century britain this is the first major study to trace the evolution of architectural ideas during the period by examining the literary output of architects it is a work of extraordinary scholarship based on an extensive search of dozens of major library collections that will serve as a standard resource for researchers and librarians book dealers and collectors most of the book is devoted to descriptions of hundreds of books and periodicals containing original designs for domestic structures the earliest title described is colen campbell's vitruvius britannicus 1715 an important palladian manifesto and the first book to illustrate a series of the author's own executed designs for dwellings intended to redirect and reform british architectural taste and the latest title is supplement 1842 to john claudius loudon's encyclopedia related materials on agriculture landscape design drawing and perspective also are covered each entry includes a bibliographic description of all known editions and a commentary that describes and analyzes the text and plates focusing in particular on the author's ideas and approaches to design issues appendixes to the principal entries provide a checklist of additional handbooks and manuals by important authors such as crunden halfpenny langley nicholson pain richardson salmon and swan and books showing domestic interiors there is also a valuable short title chronological list and a list of printers publishers and booksellers in a lengthy introductory essay archer discusses architecture and the book trade the format

and content of the books and aspects of architectural theory and design including ideas of character and retirement dwelling types such as villas cottages and row houses model housing for laborers and town and village planning john archer is associate professor in the humanities program at the university of minnesota
