government secrets necessary for national security and when does the public have a right to know is too much information classified when do databanks eavesdropping and surveillance invade our privacy is self deception justified if the truth would be psychologically disturbing in short can we know more than is good for us the author takes the general position that too much material is prohibited especially today even while business and government invade individual privacy more and more a primary assumption in a democracy is that we can have confidence in the people so information should not be forbidden unless there is a vital and compelling reason to withhold it
