from the bestselling authors of the right nation a visionary argument that our current crisis in government is nothing less than the fourth radical transition in the history of the nation state dysfunctional government it s become a cliché and most of us are resigned to the fact that nothing is ever going to change as john micklethwait and adrian wooldridge show us that is a seriously limited view of things in fact there have been three great revolutions in government in the history of the modern world the west has led these revolutions but now we are in the midst of a fourth revolution and it is western government that is in danger of being left behind now things really are different the west s debt load is unsustainable the developing world has harvested the low hanging fruits industrialization has transformed all the peasant economies it had left to transform and the toxic side effects of rapid developing world growth are adding to the bill from washington to detroit from brasilia to new delhi there is a dual crisis of political legitimacy and political effectiveness the fourth revolution crystallizes the scope of the crisis and points forward to our future the authors enjoy extraordinary access to influential figures and forces the world over and the book is a global tour of the innovators in how power is

to be wielded the age of big government is over the age of smart government has begun many of the ideas the authors discuss seem outlandish now but the center of gravity is moving quickly this tour drives home a powerful argument that countries success depends overwhelmingly on their ability to reinvent the state and that much of the west and particularly the united states is failing badly in its task china is making rapid progress with government reform at the same time as america is falling badly behind washington is gridlocked and america is in danger of squandering its huge advantages from its powerful economy because of failing government and flailing democracies like india look enviously at china s state of the art airports and expanding universities the race to get government right is not just a race of efficiency it is a race to see which political values will triumph in the twenty first century the liberal values of democracy and liberty or the authoritarian values of command and control the stakes could not be higher

making the revolution global shows how black radicals transformed socialist politics in britain in the years before decolonisation african and caribbean activist intellectuals such as amy ashwood garvey c l r james jomo kenyatta kwame nkrumah and george padmore came to britain during the 1930s and 1940s and intervened in debates about capitalism imperialism fascism and war they consistently argued that any path towards international socialism must have colonial liberation at its heart although their ideas were met with opposition from many on the british left they convinced significant sections of the movement of the revolutionary potential of colonised peoples by centring the entanglements between black radicals and the wider british socialist movement theo williams casts new light on responses to the 1935 italian invasion of ethiopia the 1945 fifth pan african congress and a wealth of other events and phenomena in doing so he showcases a revolutionary tradition that as illustrated by the global black lives matter demonstrations of 2020 is still relevant today

the 21st century has witnessed a considerable and increasing number of political revolutions around the world this contradicts the popular belief of many experts in the 1970s that revolutions occurred mainly in monarchies and empires instead the revolutions of this century have several new characteristics which call for a renewed analysis of the subject this handbook offers a comparative perspective on the new wave of revolutions of the last decade presenting case studies on the color revolutions the arab revolutions of 2010 2011 and the global wave of revolutions in 2013 2018 that spanned regions ranging from africa to the caucasus it offers a better understanding of the varied forms features and historical backgrounds of revolutions as well as their causes accordingly it highlights recent revolutions in their historical and world systems contexts the handbook is divided into seven parts the first of which examines the history of views on revolution and important aspects of the theory of revolution the second part analyzes revolutions within long term historical trends and in their world system contexts in turn

the third part explores specific major revolutionary waves in history the fourth part analyzes the first revolutionary wave of the 21st century 2000 2009 the so called color revolutions while the fifth discusses the second wave the arab spring 2010 2013 as an important turning point the sixth part is dedicated to analyzing revolutions and revolutionary movements beyond the arab spring and some revolutionary events from the third wave that began in 2018 the seventh and final part offers forecasts on the future of revolutions given its scope the book will appeal to scholars and students from various disciplines interested in historical trends sociopolitical change contentious politics social movements and revolutionary processes involving both nonviolent campaigns and political violence once again this volume demonstrates the kind of open minded systematic analysis that the field of revolutionary studies requires prof george lawson department of international relations australian national university canberra
