religion plays a central role in a variety of social movements including many that are not explicitly faith based this book provides the first systematic analysis of the ways religion contributes to diverse movements for social change it draws on a variety of case studies from the us and globally to build an argument about religion s distinctive capacity to provide logistical support to inspire and legitimize activist practices to connect different spatial scales and to link big ideas to everyday experiences the book s analysis rests on three foundational arguments first and most fundamentally it is impossible to understand movements for social change without analyzing the multiple ways that religion shapes their ideas communities and practices second religion is always in mutually transformative interaction with social and political forces and can never be entirely separated from them in social movements and in the public sphere more generally people interpret politics with values and concepts drawn from religion and understand their activism as spiritually meaningful this challenges the assumption that religion is a largely a private matter third scholars must treat religion as a relatively independent variable which actively shapes social processes just as it is shaped by them we cannot make sense of religion s role in social movements without acknowledging that religious institutions and traditions have to some extent a life of their own
