the research studies included in this special issue highlight the fundamental contribution of the knowledge of environmental history to conscious and efficient environment conservation and management the long term perspective of the dynamics that govern the human climate ecosystem is becoming one of the main focuses of interest in biological and earth system

sciences multidisciplinary bio geo archaeo investigations into the underlying processes of human impact on the landscape are crucial to envisage possible future scenarios of biosphere responses to global warming and biodiversity losses this special issue seeks to engage an interdisciplinary dialog on the dynamic interactions between nature and society focusing on long term environmental data as an essential tool for better informed landscape management decisions to achieve an equilibrium between conservation and sustainable resource exploitation

by studying the many ways diverse peoples have changed shaped and conserved the natural world over time environmental historians provide insight into humanity s unique relationship with nature and more importantly are better able to understand the origins of our current environmental crisis beginning with the precolonial land use practice of native americans and concluding with our twenty first century concerns over our global ecological crisis american environmental history addresses contentious issues such as the preservation of the wilderness the expulsion of native peoples from national parks and population growth and considers the formative forces of gender race and class entries address a range of topics from the impact of rice cultivation slavery and the growth of the automobile suburb to the effects of the russian sea otter trade columbia river salmon fisheries the environmental justice movement and globalization this illustrated reference is an essential companion for students interested in the ongoing transformation of the american landscape and the conflicts over its resources and conservation it makes rich use of the tools and resources climatic and geological data court records archaeological digs and the writings of naturalists that environmental historians rely on to conduct their research the volume also includes a compendium of significant people concepts events agencies and legislation and an extensive bibliography of critical films books and sites

barely two centuries ago most of the world s productive land still belonged either communally to traditional societies or to the higher powers of monarch or church but that pattern and the ways of life that went with it were consigned to history as a result of the most creative and at the same time destructive cultural force in the modern era the idea of individual exclusive ownership of land this notion laid waste to traditional communal civilisations displacing entire peoples from their homelands and brought into being a unique concept of individual freedom and a distinct form of representative government and democratic institutions other great civilizations in russia china and the islamic world evolved very different structures of land ownership and thus very different forms of government and social responsibility the seventeenth century english surveyor william petty was the first man to recognise the connection between private property and free market capitalism the american radical wolf ladejinsky redistributed land in japan taiwan and south korea after the second world war to make possible the emergence of asian tiger economies through the eyes of these remarkable individuals and many more including chinese emperors and german peasants andro linklater here presents the evolution of land ownership to offer a radically new view of mankind s place on the planet

includes titles on all subjects some in foreign languages later incorporated into memorial library
