distribution of life within the universe it is also one of the few scientific disciplines that attracts the public's intense curiosity and attention this interest stems largely from the deep personal meaning that the possible existence of extraterrestrial life has for so many whether this meaning relates to addressing the 'big questions' of our existence the possibility of encountering life on other planets or the potential impact on our understanding of religion there is no doubt that the public is firmly vested in finding answers in this broadly accessible introduction to the field bruce jakosky looks at the search for life in the universe not only from a scientific perspective but also from a distinctly social one in lucid and engaging prose he addresses topics including the contradiction between the public's fascination and the meager dialogue that exists between those within the scientific community and those outside of it and what has become some of the most impassioned political wrangling ever seen in government science funding

excerpt from the science of society this book was first printed nearly forty years ago its seed for the most part fell upon stony ground in consequence of this cold reception this lack of demand the work passed through but a few small editions and then disappeared from the market the author's keen broad and untiring mind leading him into new fields of thought he never reprinted it thus for more than a quarter of a century it has been practically out of sight out of mind nevertheless its work has never stopped here and there the seed did fall upon oases and in fertile spots it always took deep root and reproduced its kind its children and grand children and great grand children have seldom been conscious of their ancestry but today the family is so numerous that the branches of its genealogical tree pervade with a growing and often a controlling influence every department of what mr andrews happily calls man's social habitat it can be only helpful to this family to be made acquainted with its origin especially when the power of the printing press enables it to revive and freshly scatter the parent seed upon a more receptive soil such is the purpose of this new edition of the science of society the social problem is pressing more closely upon our heels than it was in 1851 and a book expounding as lucidly as this the basic principles in which alone its solution is to be found is greatly needed the author himself in the closing years of his life earnestly desired its republication and the publisher takes pleasure in the thought that the enterprise would meet his approbation and not only his but that of josiah warren as well who was never tired of praising mr andrews's work as in his opinion the soundest exposition that ever had been made or ever could be made of the two principles which he mr warren had introduced to the world in his less pretentious work true civilization but even if this double incentive of satisfying a
