charles waldheim has assembled the definitive collection of essays by many of the field's top practitioners capturing the origins the contemporary milieu and the aspirations of this relatively new field an indispensable reference for students teachers architects and urban planners

a definitive intellectual history of landscape urbanism it has become conventional to think of urbanism and landscape as opposing one another or to think of landscape as merely providing temporary relief from urban life as shaped by buildings and infrastructure but driven in part by environmental concerns landscape has recently emerged as a model and medium for the city with some theorists arguing that landscape architects

are the urbanists of our age in landscape as urbanism one of the field's pioneers presents a powerful case for rethinking the city through landscape charles waldheim traces the roots of landscape as a form of urbanism from its origins in the renaissance through the twentieth century growing out of progressive architectural culture and populist environmentalism the concept was further informed by the nineteenth century invention of landscape architecture as a new art charged with reconciling the design of the industrial city with its ecological and social conditions in the late twentieth and early twenty first centuries as urban planning shifted from design to social science and as urban design committed to neotraditional models of town planning landscape urbanism emerged to fill a void at the heart of the contemporary urban project generously illustrated landscape as urbanism examines works from around the world by designers ranging from ludwig hilberseimer andrea branzi and frank lloyd wright to james corner adriaan geuze and michael van valkenburgh the result is the definitive account of an emerging field that is likely to influence the design of cities for decades to come

landscape urbanism vs the new urbanism negotiating the relationship between cities and the natural world

on the heels of our groundbreaking books in landscape architecture james corner's recovering landscape and charles waldheim's landscape urbanism reader comes another essential reader examining our shifting perceptions of nature and place in the context of environmental challenges and how these affect urbanism and architecture the seventeen essayists in argue for an all encompassing view of landscape that integrates the scientific intellectual aesthetic and mythic into a new multidisciplinary understanding of the contemporary landscape a must read for anyone concerned about the changing nature of our landscape in a time of climate crisis

the theme of this volume is landscape urbanism with the agenda of linking emergent theories of landscape urbanism with its contemporary practice while a few recent symposiums and articles have addressed components of the subject the underlying theoretical trajectory of this emergent field has still not been codified in an accessible way the publication of volume 14 of center will fill this void with the inclusion of a reprint series of historically significant texts combined with original articles by noted authors and emerging practitioners

positioning design at the center of the debate the urbanism reader brings together classic and contemporary readings to help designers understand the complexities of cities and urban design in the 21st century the selection of readings presented here is uniquely tailored to a design perspective for architects and urban designers balancing social issues in urbanism with a clear focus on foregrounding design as an instrument for change in

cities and examining the outcomes and challenges of recent design theories design methods and technologies in the built urban environment covering today's most urgent issues 45 texts explore key topics in urbanism from digital design technologies to smart cities from the ongoing ecological crisis to public health and the impact of covid 19 and from emergence and informality to economic inequity in global cities chapters cover cultural issues including diversity indigenous knowledge decolonization social justice and inclusion alongside technological developments while a final chapter speculates on the future of urbanism through readings in ai virtual reality and the frontiers of current thinking in architecture and urban design the extracts are grouped by theme each with an introduction to the historical contexts and guiding paradigms helping design students researchers and professionals to make sense of the diverse field of theory and practice in the past present and future of global urbanism

the second edition of the urban design reader draws together the very best of classic and contemporary writings to illuminate and expand the theory and practice of urban design nearly 50 generous selections include seminal contributions from howard le corbusier lynch and jacobson to more recent writings by waldheim koolhaas and sorkin following the widespread success of the first edition of the urban design reader this updated edition continues to provide the most important historical material of the urban design field but also introduces new topics and selections that address the myriad challenges facing designers today the six part structure of the second edition guides the reader through the history theory and practice of urban design the reader is initially introduced to those classic writings that provide the historical precedents for city making into the twentieth century part two introduces the voices and ideas that were instrumental in establishing the foundations of the urban design field from the late 1950s up to the mid 1990s these authors present a critical reading of the design professions and offer an alternative urban design agenda focused on vital and lively places the authors in part three provide a range of urban design rationales and strategies for reinforcing local physical identity and the creation of memorable places these selections are largely describing the outcomes of mid century urban design and voicing concerns over the placeless quality of contemporary urbanism the fourth part of the reader explores key issues in urban design and development ideas about sprawl density community health public space and everyday life are the primary focus here several new selections in this part of the book also highlight important international development trends in the middle east and china part five presents environmental challenges faced by the built environment professions today including recent material on landscape urbanism sustainability and urban resiliency the final part examines professional practice and current debates in the field where urban designers work what they do their roles their fields of knowledge and their educational development the section concludes with several position pieces and debates on the future of urban design practice this book provides an essential resource for students and practitioners of urban design drawing together important but widely dispersed writings part and

section introductions are provided to assist readers in understanding the context of the material summary messages impacts of the writing and how they fit into the larger picture of the urban design field

the second issue of *ness docs* titled *landscape as urbanism in the americas* convenes a series of discussions lead by office for urbanization at harvard gsd directed by charles waldheim on the potentials for landscape as a medium for urban intervention in the specific social cultural economic and ecological contexts of latin american cities it features more than twenty projects developed by latin american practices such as tatiana bilbao estudio groundlab fábrica de paisaje and gathers original texts by them as well as essays by luis callejas alfredo ramirez and manuel gausa among others

contents 1 context sensitive landscape architecture 2 aims of landscape architecture 3 theory in landscape architecture 4 ten historic design theories 5 modernist postmodern and post postmodern art 6 modern design theory including ecological design and esri geodesign 7 postmodern design theory including deconstructionism and landscape urbanism 8 post postmodern design theory including pakilda and ecological urbanism 9 on values including mcharg land ethics and environmental ethics

the concepts of metabolism ecosystems and circular economy are currently challenging the discipline of urbanism the book questions the european foundation of urbanism in relation to the challenge of territorial metabolism and combines theoretical contributions with cutting edge design proposals for european metropolitan regions

urban design continues to grow as an increasingly important and expanding field of study research and professional endeavour distinguished by its broad scope and comprehensiveness on the subject of urban design this new collection combines selected essays from both practitioners and academia writing urbanism is the ideal volume for both students architects and urban designers

open city is the theme of the 4th international architecture biennial rotterdam open city designing coexistence is the publication to accompany this international event which will be held in rotterdam from 24 september 2009 to 10 january 2010 the book demonstrates the crucial role that architecture and urban design can play to enable access and facilitate coexistence to stimulate conditions for an open city accessible city today the open city is a tenuous notion as our cities grow and diversify social and cultural groups struggle to coexist and make conflicting demands on the city's resources for many the opportunities the city promises are scarce or unattainable how can our cities provide access for all in this millennium

part 1 dimensions the open city does not have latitude or longitude but it exists in our imagination in part 1 writers from different disciplines sociology ethnography geography law history economy and urban design map various theoretical dimensions of the open city and consider the global forces that challenge it part 2 situations the open city is not a place but a condition it has no masterplan each context requires a distinct approach part 2 of this book documents work by international architects urban designers and activists who were asked to initiate and implement projects for an open city in urban situations that are currently in flux

as a metaphor the island has been a fecund source of inspiration across many domains yet the concept seems to contradict trends toward interconnectedness in the geographic and design fields an atlas of islands new geographies 8 explores the new limits of islandness and gathers examples to reassert its relevance for design disciplines
