despite american education s mania for standardized tests testing misses what matters most about learning the desire to learn in the first place susan engel offers a highly readable exploration of what curiosity is how it can be measured how it develops in childhood and how educators can put curiosity at the center of the classroom

this bold and brilliant book asks the ultimate question of the life sciences how did the human mind acquire its incomparable power in seeking the answer donald traces the evolution of human culture and cognition from primitive apes to a i presenting an enterprising and original theory of how the human mind evolved from its presymbolic form

how is it possible for people to remember past events or visualize future ones why have only humans mastered the use of language what are the physical processes of the different states of consciousness seeing waking sleeping dreaming thinking and others origins of the mind answers these and other questions as it explain the relationship between mind and body and describes the physical basis for the functions of the human brain

since the 1980s consensus opinion is that the mind is like a collection of specialised modules each tasked for a specific purpose the author seeks to elucidate and account for this theory and explain what it means to be human in this context

this volume in the vancouver studies in cognitive science series concerns metarepresentation the construction and use of representations that represent other representations metarepresentations are ubiquitous among human beings whenever we think or talk about mental states or linguistic acts or theorize about the mind or language this volume collects previously unpublished studies on the subject by an interdisciplinary group of contributors including daniel dennett alvin goldman keith lehrer leda cosmides and john tooby

extends and evaluates the machiavellian intelligence hypothesis for intelligence s social basis

the development of social cognition presents a lively up to date examination of both the classical issues and contemporary understanding of theory and research in social cognitive development the initial chapters highlight one of the central theoretical tensions in the field which is whether the development of understanding people is fundamentally different from understanding things subsequent chapters are devoted to development across specific areas of social cognition from infancy through to adolescence the text ends with a comprehensive examination of the development of moral aspects of social cognition

one of america s most prominent psychiatrists reveals the missing link between neuroscience and the qualities that make us fully human arguing that new child rearing patterns and impersonal technologies may interrupt the natural development of children

social communication development and disorders examines the integrated development of social linguistic and cognitive functions it provides evidence based clinical information on effective assessment and intervention for individuals with social communication disorders the second edition of this standout text is fully updated to reflect up to date research evidence and the application of the international classification of functioning disability and health children and youth version and places a strong focus on cultural differences in social communication and extended developmental information from birth to adulthood part 1 explores topics including theoretical perspectives on social communication neuroscience of social communication and social cognitive social emotional and social communication development part 2 covers social pragmatic communication disorder and associated disorders such as language impairment autism spectrum disorder attention deficit disorder and disruptive behavior disorder chapters feature case studies incidence prevalence estimates dsm 5 definitions referral guidelines recommended assessment and intervention practices as well as a list of clinical and instructional resources this comprehensive and practical text is essential reading for both undergraduate and graduate students of communication sciences speech and language disorders as well as speech language pathology it is also an excellent reference for professionals working with individuals with social competence or social communication problems including speech language pathologists teachers psychologists social workers counsellors school nurses behavioral therapists and occupational therapists

a groundbreaking theory of what makes the human mind unique the recursive mind challenges the commonly held notion that language is what makes us uniquely human in this compelling book michael corballis argues that what distinguishes us in the animal kingdom is our capacity for recursion the ability to embed our thoughts within other thoughts i think therefore i am is an example of recursive thought because the thinker has inserted himself into his thought recursion enables us to conceive of our own minds and the minds of others it also gives us the power of mental time travel the ability to insert past experiences or imagined future ones into present consciousness drawing on neuroscience psychology animal behavior anthropology and archaeology corballis demonstrates how these recursive structures led to the emergence of language and speech which ultimately enabled us to share our thoughts plan with others and reshape our environment to

better reflect our creative imaginations he shows how the recursive mind was critical to survival in the harsh conditions of the pleistocene epoch and how it evolved to foster social cohesion he traces how language itself adapted to recursive thinking first through manual gestures then later with the emergence of homo sapiens vocally toolmaking and manufacture arose and the application of recursive principles to these activities in turn led to the complexities of human civilization the extinction of fellow large brained hominins like the neandertals and our species supremacy over the physical world

the title of mark turner s bold new book describes not a bookish mind but the ordinary human mind in which literary mental powers are the basis of everyday thought in the literary mind turner argues that we have been looking in the wrong places for answers to basic questions about meaning mind and language here turner ranges from the tools of modern linguistics and classical rhetoric to the recent work of neuroscientists such as antonio damasio and gerald edelman to literary masterpieces by homer dante shakespeare and proust as he explains how story and projection and their powerful combination in parable are fundamental to everyday thought language itself he concludes is the child of the literary mind offering major revisions to our understanding of thought conceptual activity and the origin and nature of language the literary mind presents a unified theory of central problems in cognitive science linguistics neuroscience psychology and philosophy adventurous and convincing turner s work launches a new understanding of what it is to have a human brain

applying an evolutionary framework to advance the understanding of child development this volume brings together leading figures to contribute chapters in their areas of expertise researcher and student friendly chapters adhere to a common format

this title offers a theory of how human conceptual life begins and shows how perceptual information becomes transformed into concepts

in this immensely erudite book german classicist bruno snell traces the establishment of a rational view of the nature of man as evidenced in the literature of the greeks in the creations of epic and lyric poetry and in the drama here are the crucial stages in the intellectual evolution of the greek world the homeric world view the rise of the individual in the early greek lyric myth and reality in greek tragedy greek ethics the origin of scientific thought and arcadia
