this work highlights how the costs and co2 emissions of land based wind turbines can be reduced by means of an innovative and material efficient support structure concept thereby the yaw system is placed at the tower base allowing the whole wind turbine tower to be rotated the potential of a rotatable inclined lattice tower concept was analysed by means of aero servo elastic load simulations in the fast environment a balance between different cost aspects revealed significant savings

how how did this happen to us how did humans end up becoming savage barbarians i asked we took a wrong turn from an evolutionary perspective he replied robots provided us shelter fed us and clothed us in the end they domesticated humans the chicken s tale one day man came to the forest and set up a large coop with warm nests the jungle fowl moved into the coop where it was warm and cozy and food was always available they were now completely domesticated and idle they did not need to gather food build nests or help raise their chicks they decided that they ought to create a new society one where they did not need families and where they could mate as they pleased however back in the wild the roosters that remained exhibited monogamy built nests and helped protect their hens while they hatched their eggs as generations passed the domesticated roosters turned very violent they had no responsibilities free food and shelter made such skills as those exhibited by the wild roosters redundant they constantly fought with each other for mating rights as that was the only concern in their lives earlier the roosters rarely fought now they spent their waking hours fighting for sexual dominance the food and shelter were not free the roosters had paid a very high price for further reading visit ramayana 3000 com
