this book is dedicated to the nascent discussion of the legal aspects of human exploration and possible settlement of mars and provides fresh insights and new ideas in two key areas the first one revolves around the broader aspects of current space law such as intellectual property rights in outer space the legal implications of contact with extra terrestrial intelligence legal considerations around the freedom of exploration and use and the international space station agreement as a precedent for mars the second one focuses on the creation and management of a new society on mars and includes topics such as human reproduction and childbirth the protection of human rights in privately funded settlements legal aspects of a martian power grid and criminal justice on the red planet with multiple national space agencies and commercial enterprises focusing on mars it is more than likely that a human presence will be established on the red planet in the coming decades while the foundation of international space law laid primarily by the outer space treaty remains the framework within which humans will engage with mars new and unforeseen challenges have arisen driven particularly by the rapid pace of technological advancement in recent years to ensure that space law can keep up with these developments a new scholarly work such as the present one is critical by bringing together a number of fresh international perspectives on the topic the book is of interest to all scholars and professionals working in the space field

this select volume of historical documents is organized chronologically spanning from 1914 to the present divided into eight chapters it includes a narrative introduction to each historical period this collection of historical documents provides insight into the history of the united states in its pursuit of the peaceful uses of outer space with emphasis on the manned space program of the national aeronautics and space administration as well as commercial american activities supporting human spaceflight in the early 21st century rocketry and space technology have served varied goals throughout the space age pure research as well as research applied for national security national prestige and commercial profit there have been varied actors as well among them individuals supported by philanthropists as well as governments intergovernmental organizations international consortiums and for profit corporations this book focuses on space exploration and in particular human space exploration leading to the questions why have humans gone into outer space in the past and why will they do so in the future these documents help readers to examine the variety of fascinating answers to those questions

francis lyall and paul b larsen have been involved in teaching and researching space law for over 50 years this new edition of their well received text gathers together their knowledge and experience in readable form and covers developments in all space applications including space tourism telecommunications the itu and finance with an extensive citation of the literature the discussion provides an excellent source for both students and practitioners

a vivid behind the scenes history of the cold war s space race between the soviets americans following the launch of sputnik in his exuberant narrative of the superpower space race brzezinski tells the story of american and soviet decisions with remarkable dramatic even cinematic flair the new york times book review in red moon rising matthew brzezinski recounts the dramatic behind the scenes story of the fierce battles on earth that preceded and followed the launch of sputnik on october 4 1957 he takes us inside the kremlin the white house secret military facilities deep cover safe houses and the halls of congress to bring to life the russians and americans who feared and distrusted their compatriots at least as much as their superpower rivals drawing on original interviews and new documentary sources brzezinski tells a story rich in the paranoia of the time and the combatants include three u s presidents survivors of the gulag corporate chieftains ambitious apparatchiks rehabilitated nazis and a general who won the day by refusing to follow orders the true story of the birth of the space age has never been told in such vivid detail and red moon rising brings it memorably to life a spectacular and accessible history of the space race brzezinski displays depth insight and showmanship usa today brzezinski is a wonderfully colorful writer combining a scientific plotline with the history and characters of a cold war thriller the times london the writing is fast paced and crisp the stakes high and the tension palpable from the first pages of this high flying account of the early days of the space race between the u s and u s s r publishers weekly starred review comparable to paul dickson s sputnik shock of the century brzezinski s speedy narrative of the first satellite slings readers from launch pads to conference rooms a kinetic rendition of sputnik this will score with spaceflight buffs booklist

discusses the red planet early observations and beliefs and future exploration

exploitation of information and communications technologies ict is critical to building the knowledge economy this work brings together a comprehensive collection of contributions on commercial government or societal exploitation of the internet and ict representing research and practical eadoption from africa the americas asia and europe

contains primary and secondary source materials including graphs charts quotes and articles that provide information about national security in the united states covering organization international terrorism the war on terror homeland security countries of concern proliferation of weapons american civil liberties human rights and u s relations with the islamic world

strategists often ask with the means available right now what end can we achieve however in strategy design it can be more appropriate to ask what is the desired end and what means are available to achieve it the answer to this question may be if this is the desired end first this new capability has to be created essentially what president john kennedy was asking vice president lyndon johnson in april 1961 was what means do i need to generate if i want to beat the soviets in a space race to succeed the united states had to use the available instruments and elements of

national power to create new means to reach the desired end within the time frame that kennedy set with the national war college national security strategy primer as its guide and using primary and secondary sources this case study examines how kennedy determined he could achieve his ends beat the soviets in the world competition in a particular way shape the world conversation using means yet to be created the moon landing publisher s description

a compilation of current and historical statistics with analysis on space exploration

like citrus oil movies radio and television aerospace helped create southern california and embody its values blue sky metropolis launches an entirely fresh consideration of an iconic industry that answered the immemorial hunger of the human race for flight and the future kevin starr university of southern california blue sky metropolis presents an intriguing survey of a unique time in southern california history when cheap land and benign weather lured massive aerospace enterprises to the region eventually serving as home to nearly half of the nation s defense and space fabricators before there was a silicon valley high tech dreamers were on the loose in the southland creating inventions as diverse as the voyager planetary spacecraft and the stealth bomber these highly readable essays help us understand how it happened how southern california shaped aerospace and vice versa charles elachi director jet propulsion laboratory peter westwick has assembled a rich collection of essays that tell a wonderful story about the importance of the aerospace industry to southern california and the importance of southern california to the aerospace industry there s technology sociology economics geography anthropology and much more woven through the chapters it s an ambitious project but it succeeds in being interesting informative and entertaining michael rich president and ceo the rand corporation
