an indictment of the mistreatment of the deaf community by a hearing establishment that resists understanding and awareness copyright libri gmbh all rights reserved

represents a sociological history of how deaf people came to be classified as disabled from the 17th century through the 1990s

this book provides an interdisciplinary approach to the challenges of the interface between disability culture twelve papers discuss the following topics towards a cultural model of disability disability values representations realities labeling

an explicit and detailed breakdown from the perspective of participants of why disabled people are engaged in a revolution a revolution to break down barriers of attitude and the environment i am sure it will have a place of honour in the increasing list of disability literature journal of social policy the major theme of this accessible and engaging text is that disability is caused by the way society is organized the contributors demonstrate the many ways in which disabled people have taken the initiative in reshaping both the meaning of disability and the services and support available to them the notion that disability is either a medical condition or a personal tragedy is strongly challenged and the marginalized position of black disabled people and disabled women is also addressed focusing on the barriers which disabled people encounter in education housing leisure and employment this book critically reviews professional practice and describes alternative models of support which give disabled people control over their own lives disabling barriers enabling environments is the course reader on the open university course the disabling society k665

this book is about the importance of placing the views of families with deaf children at the front of policies and practices which impact on their lives it concerns such families in a variety of different situations and circumstances facing a whole range of issues many of which are equally relevant to children with other impairments and their families the aim of the book is to raise awareness of how enabling environments can be provided for deaf children and their families

the second edition of the disability studies reader builds and improves upon the classic first edition which has sold well over 6000 copies since 1999 as a field disability studies burst onto the scene across the social sciences and humanities in the 1990s and the first edition of the reader gathered the best work that had been written on the subject including essays by famous authors such as susan sontag and erving goffman the new edition is more global in its coverage and adds material on genetic testing the human genome queer studies and issues in developing countries the size of the audience has grown since the first edition s publication and the second edition s new material will

make it even more useful for courses on the subject courses on the subject have mushroomed in the past ten years and can now be found across the social sciences humanities and behavioral sciences

the aim of this thesis is to consider the disabling nature of deafness as misrecognition the nature of deafness is not merely confined to the disabled body instead the degree of the disability is heavily determined by the process of recognition within social interactions motivating this thesis is the inherent difficulty in resolving the conflict between deaf culture and cochlear implants the debates between interpreting deafness as disability and deafness as difference is problematic both are too extreme and do not capture the essence of deafness asserting deafness as cultural allows for relativism thus allowing the idea of deafness as purely disabled in itself as an acceptable idea in ethics these rather common approaches do not help with the defence of deaf culture i argue that the ideal way to defend deaf culture the appropriate source of recognition for deaf people and people with hearing loss is by revising the deafhood model proposed by paddy ladd asserting a universal conception of deaf culture incorporating the normative elements of recognition as argued by honneth as a phenomenological requirement for deaf people not a cultural one the corollary of this argument is that deaf culture has a teleological function to promote the wellbeing of deaf people

geographical listing of grants under states excludes grants for mental health counselling or for psychological and behavioral research entries give limitation statement and recipient grantees information amount location date authorized receipt geographic subject and foundation indexes

deaf people are subject to different concepts of the deaf and disabled and their place within society there is a danger that some deaf people will become marginalized within the prevailing policy or service framework which in itself mitigates against full rights choice and participation there is therefore a great need to identify a common language for the experience of oppression and empowerment which all deaf people can share without sacrificing their rights to self definition

ingram philosophy loyola university brings a variety of current social dilemmas together in a mutually illuminating way he examines the concept of legal equality in a multiracial society by considering issues such as self governance for native americans the rights of immigrants affirmative action and racial redistricting tie also tackles the problem of social injustice in a global setting by assessing the negative impact of free trade policies on the rights of groups to self determination and cultural integrity
