today there is much talk of a crisis of trust a crisis which is almost certainly genuine but usually misunderstood trust a history offers a new perspective on the ways in which trust and distrust have functioned in past societies providing an empirical and historical basis against which the present crisis can be examined and suggesting ways in which the concept of trust can be used as a tool to understand our own and other societies geoffrey hosking argues that social trust is mediated through symbolic systems such as religion and money and the institutions associated with them such as churches and banks historically these institutions

have nourished trust but the resulting trust networks have tended to create quite tough boundaries around themselves across which distrust is projected against outsiders. Hosking also shows how nation states have been particularly good at absorbing symbolic systems and generating trust among large numbers of people while also erecting distinct boundaries around themselves despite an increasingly global economy. He asserts that in the modern world it has become common to entrust major resources to institutions we know little about and suggests that we need to learn from historical experience and temper this with more traditional forms of trust or become an ever more distrustful society with potentially very destabilising consequences.

In 1989 the Berlin Wall came down two years later the Soviet Union disintegrated. The collapse of communism in Eastern Europe and the Soviet Union discredited the idea of socialism for generations to come. It was seen as representing the final and irreversible victory of capitalism. This triumphal dominance was barely challenged until the 2008 financial crisis threw the Western world into a state of turmoil. Through analysis of post-socialist Russia and Central and Eastern Europe as well as of the United Kingdom, China and the United States, socialism, capitalism and alternatives confronts the difficulty we face in articulating alternatives to capitalism. Socialism and threatening populist regimes beginning with accounts of the impact of capitalism on countries left behind by the planned economies. The volume moves on to consider how China has become a beacon of dynamic economic growth aggressively expanding its global influence. The final section of the volume poses alternatives to the ideological dominance of neoliberalism in the West. Since the 2008 financial crisis demands for social change have erupted across the world exposing the failure of neoliberalism in the United Kingdom and examining recent social movements in Europe and the United States. The closing chapters identify how elements of past ideas are re-emerging among them: Keynesianism and radical socialism as those chapters indicate these ideas might

well have potential to mobilise support and challenge the dominance of neoliberalism
