did new left activists have an opportunity to start a revolution that they simply could not bring off was their rejection of conventional forms of political organization a fatal flaw or were the apparent weaknesses of the movement the lack of central authority the distrust of politics actually hidden strengths wini breines traces the evolution of the new left movement through the free speech movement students for a democratic society sds and sds s community organization projects for breines the movement s goal of participatory decision making even when it was not achieved made up for its failure to take practical and direct action by the late 1960s antiwar activism contributed to the decline of the new left as the movement was flooded with new participants who did not share the founding generation s political experiences or values originally published in 1982 wini breines s classic work now includes a

first published in 1977 the new left as an organised political phenomenon came and went largely in the 1960s was the movement that went into precipitate decline after 1969 the same new left that had developed a decade earlier nigel young s thesis is that the core new left as it had evolved by the mid 1960s had a unique identity that set it apart from other old left and marxist groups he believes that this was dissipated in the later developments of the black and student movements and in the opposition to the vietnam war by 1968 the watershed year an acute

identity crisis had set in within the movement and became the major source of the new left's disintegration. Nigel Young traces the movement's growth and crisis mainly in Britain and America where it reached its greater strength but attention is also paid to parallel developments in similar movements elsewhere. He analyses the crisis in terms of the interrelationship between dilemmas of strategy and ideas and the external events which tend to reinforce the tendencies toward elitism, intolerance and violence and produce organisational breakdown.

The New Left and the 1960s is the third volume of Herbert Marcuse's collected papers. In 1964 Marcuse published a major study of advanced industrial society, *One Dimensional Man*, which was an important influence on the young radicals who formed the New Left. Marcuse embodied many of the defining political impulses of the New Left in his thought and politics; hence a younger generation of political activists looked up to him for theoretical and political guidance. The material collected in this volume provides a rich and deep grasp of the era and the role of Marcuse in the theoretical and political dramas of the day. This volume contains articles, letters, talks and interviews including on the New Left, a transcription of the 1968 talk at the Guardian newspaper's twentieth anniversary, reflections on the French Revolution which contains comments on the 1968 French student and worker uprising, liberation from the affluent society which presents Marcuse's contribution to the 1967 Dialectics of Liberation conference and United States questions of organization and the revolutionary subject, a conversation between Marcuse and the German writer Hans Magnus Enzensberger published here in English for the first time. Edited by Douglas Kellner, this volume will be of interest to all those previously unfamiliar with Herbert Marcuse, generally acknowledged as a major figure in the intellectual and social milieu of the 1960s and 1970s, as well as to specialists who will here have access to papers and articles collected in one volume for the first time.

E. P. Thompson is a towering figure in the field of labor history, best known for his monumental and path-breaking work *The Making of the English Working Class*. But as this collection shows, Thompson was much more than a historian; he was a dedicated educator of workers, a brilliant polemicist, a skilled political theorist and a tireless agitator for peace against nuclear weapons and for a rebirth of the socialist project. The essays in this book, many of which are either out of print or difficult to obtain, were written between 1955 and 1963 during one of the most fertile periods of Thompson's intellectual and political life. When he wrote his two great works, *The Making of the English Working Class* and *William Morris: Romantic to Revolutionary*, they reveal Thompson's insistence on the vitality of a humanistic and democratic socialism along with the value of utopian thinking in radical politics. Throughout Thompson struggles to open a space independent of official communist parties and reformist social democratic parties opposing them.
