in their first book ten rules for strategic innovators the authors provided a better model for executing disruptive innovation they
 laid out a three part plan for launching high risk high reward innovation efforts 1 borrow assets from the existing firms 2 unlearn
 and unload certain processes and systems that do not serve the new entity and 3 learn and build all new capabilities and skills
 in their study of the ten rules in action govindarajan and trimble observed many other kinds of innovation that were less risky
 but still critical to the company s ongoing success in case after case senior executives expected leaders of innovation initiatives
 to grapple with forces of resistance namely incentives to keep doing what the company has always done rather than develop
 new competence and knowledge but where to begin in this book the authors argue that the most successful everyday
 innovators break down the process into six manageable steps 1 divide the labor 2 assemble the dedicated team 3 manage the
 partnership 4 formalize the experiment 5 break down the hypothesis 6 seek the truth the other side of innovation codifies this
 staged approach in a variety of contexts it delivers a proven step by step guide to executing launching managing and
 measuring more modest but necessary innovations within large firms without disrupting their bread and butter business
