philosophy is love of wisdom there is continual danger that the ports of the search will be taken as the final goal the constitutive absoluteness of its goal points to an unknown absolute this absolute creates a place for thinking about god thus the god question plays its role in every philosophy from antiquity to the present the way begins with man as the entry point of the question concerning transcendence then this question is shown to be directed toward god the middle section is dedicated to the arguments concerning divine existence after the arguments for the reasonableness of belief in god we deal with the relationship of philosophical thought about god to living faith finally the ways to a search for god carried out in trust which certain thinkers have followed while recognizing its problems is outlined

offers many fresh insights that will give even longtime readers of shakespeare a new appreciation of the great master scholars have long debated the extent of shakespeare s education although his friend and admirer ben jonson said of him thou hadst small latine and lesse greek shakespeare s plays reveal a wide familiarity with literary and philosophical works

from the renaissance the middle ages and the classical age philosopher farhang zabeeh delves into this fascinating topic in this detailed study of the philosophical influences evident in shakespeare s plays and sonnets readers will be surprised and delighted to discover in shakespeare unmistakable echoes of plato aristotle cicero dante montaigne and other famous thinkers in one chapter the author makes a convincing case that one of the bard s most famous comic characters john falstaff is a parody of socrates in other chapters he demonstrates indirect references to plato in shakespearean passages concerning appearance versus reality as well as the influence of aristotle s ethics other common philosophical themes evident in the plays concern the nature of time subjectivity versus objectivity and political and moral values

we say the grass is green or lemons are yellow to state what everyone knows but are the things we see around us really colored or do they only look that way because of the effects of light rays on our eyes and brains is color somehow unreal or subjective and dependent on our human perceptions and the conditions under which we see things distinguished scholar barry stroud investigates these and related questions in the quest for reality in this long awaited book he examines what a person would have to do and believe in order to reach the conclusion that everyone s perceptions and beliefs about the color of things are illusions and do not accurately represent the way things are in the world as it is independently of us arguing that no such conclusion could be consistently reached stroud finds that the conditions of a successful unmasking of color cannot all be fulfilled the discussion extends beyond color to present a serious challenge to many other philosophical attempts to discover the way things really are a model of subtle elegant and rigorous philosophical writing this study will attract a wide audience from all areas of philosophy
