fifty years ago a troop of japanese macaques was observed washing sandy sweet potatoes in a stream sending ripples through the fields of ethology comparative psychology and cultural anthropology the issue of animal culture has been hotly debated ever since now kevin laland and bennett galef have gathered key voices

in the often rancorous debate to summarize the views along the continuum from culture of course to culture of course not the result is essential reading for anyone interested in the validity of animal culture and what it might say about our own

animals do have culture maintains this delightfully illustrated and provocative book which cites a number of fascinating instances of animal communication and learning john bonner traces the origins of culture back to the early biological evolution of animals and provides examples of five categories of behavior leading to nonhuman culture physical dexterity relations with other species auditory communication within a species geographic locations and inventions or innovations defining culture as the transmission of information by behavioral rather than genetical means he demonstrates the continuum between the traits we find in animals and those we often consider uniquely human

this book the first of its kind surveys islamic and muslim attitudes toward animals and human responsibilities towards them through islams s phiolosphy literature mysticism and art a must read for anyone interested in the debate on animal rights and responsible food production

of mice and men animals in human culture is a book length collection of essays that examines human views of non human animals the essays are written by scholars from australia east asia europe and the americas who represent a wide range of disciplines in the humanities and social sciences addressing topics such as animal rights ecology anthropocentrism feminism animal domestication dietary restrictions and cultural imperialism the book considers local and global issues as well as ancient and contemporary discourses and it will appeal to readers with both general and specialized interests in the role played by animals in human cultures

a fascinating exploration of the way in which animals are framed contextualized decontextualized in contemporary visual culture written in a highly engaging style this book challenges the field dealing with some highly controversial aspects of animal exploitation and boldly examines material that is seldom discussed within animal studies

cell and tissues culture has been one of the first and foremost techniques paving for recent cutting edge technologies such as vaccinology monoclonal antibody production therapeutic cloning stem cell technology etc it has played a

substantial role in the developments of health care and prophylactics industries thus serving the mankind it has made the dream of producing cost effective prophylactics diagnostics and therapeutics come true and affordable in the recent past with the explosion of knowledge in the field of biotechnology intensive research in being carried out where undergraduate and post graduate courses are being offered in this field even through more emphasis is being given to theory a dearth of practical knowledge is lacking due to paucity of established tissue culture facilities

some people insist that culture is strictly a human feat what are they afraid of this book looks into three cultures of other than human beings in some of earth's remaining wild places it shows how if you're a sperm whale a scarlet macaw or a chimpanzee you too experience your life with the understanding that you are an individual in a particular community you too are who you are not by genes alone your culture is a second form of inheritance you receive it from thousands of individuals from pools of knowledge passing through generations like an eternal torch you too may raise young know beauty or struggle to negotiate a peace and your culture too changes and evolves the light of knowledge needs adjusting as situations change so a capacity for learning especially social learning allows behaviors to adjust to change much faster than genes alone could adapt becoming wild offers a glimpse into cultures among non human animals through looks at the lives of individuals in different present day animal societies by showing how others teach and learn safina offers a fresh understanding of what is constantly going on beyond humanity with reporting from deep in nature alongside individual creatures in their free living communities this book offers a very privileged glimpse behind the curtain of life on earth and helps inform the answer to that most urgent of questions who are we here with
