This book provides the first comprehensive treatment of the principles shaping EU law: autonomy, conferral, equality, national identity, loyalty, solidarity, supremacy, and effectiveness. Much has been written about principles of EU law inspired by national law, such as fundamental rights, but what of the principles that are specific to EU law? The book discusses the origins of the EU's structural principles, where they are located, and how they are applied in practice. The author proposes that these principles are deeply interrelated and ensure the legal unity and uniformity of EU law. Their role in the EU's external relations is also explored. This book brings a much-needed focus to the network of structural principles upholding the EU's constitutional order.

This book presents the findings of a joint presidential task force of the Society of Clinical Psychology, Division 12 of APA, and of the North American Society for Psychotherapy Research. This task force was charged with integrating two previous task force findings which addressed respectively treatments that work, Division 12 APA, and relationships that work, Division 29 APA. This book transcends particular models of psychotherapy and treatment techniques to define treatments in terms of cross-cutting principles of therapeutic change. It also integrates relationship and participant factors with treatment techniques and procedures, giving special attention to the empirical grounding of multiple contributors. To change the result is a series of over 60 principles for applying treatments to four problem areas: depression, anxiety disorders, personality disorders, and substance abuse disorders. This book explains both principles that are common to many problem areas and those that are specific to different populations in a format that is designed to help the clinician optimize treatment planning.

First published in 2001, Routledge is an imprint of Taylor & Francis, an informa company.
