fishes that walk fishes that breathe air fishes that look like and are monsters from the deep these and many more strange creatures swim through the rise of fishes john a long s richly illustrated tour of the past 500 million years long has updated his classic work with illustrations of recent fossil discoveries and new interpretations based on genetic analyses he reveals how fishes evolved from ancient jawless animals explains why fishes have survived on the earth for so long and describes how they have become the dominant aquatic life form indeed to take things a step further we learn much about ourselves through this book for all amphibians reptiles birds and mammals are descendants of ancient

fishes clear accessible and engaging the rise of fishes combines scientific expertise with entertaining stories about long s own excursions which span the oceans and continents the book includes photographs of fossils from around the world as well as dramatic color illustrations depicting what those fishes may have actually looked like

take your knowledge of fishes to the next level fishes of the world fifth edition is the only modern phylogenetically based classification of the world s fishes the updated text offers new phylogenetic diagrams that clarify the relationships among fish groups as well as cutting edge global knowledge that brings this classic reference up to date with this resource you can classify orders families and genera of fishes understand the connections among fish groups organize fishes in their evolutionary context and imagine new areas of research to further assist your work this text provides representative drawings many of them new for most families of fishes allowing you to make visual connections to the information as you read it also contains many references to the classical as well as the most up to date literature on fish relationships based on both morphology and molecular biology the study of fishes is one that certainly requires dedication and access to reliable accurate information with more than 30 000 known species of sharks rays and bony fishes both lobe finned and ray finned you will need to master your area of study with the assistance of the best reference materials available this text will help you bring your knowledge of fishes to the next level explore the anatomical characteristics distribution common and scientific names and phylogenetic relationships of fishes access biological and anatomical information on more than 515 families of living fishes better appreciate the complexities and controversies behind the modern view of fish relationships refer to an extensive bibliography which points you in the direction of additional valuable and up to date information much of it published within the last few years fishes of the world fifth edition is an invaluable resource for professional ichthyologists aquatic ecologists marine biologists fish breeders aquaculturists and conservationists

the contribution of aquaculture and fisheries to gross domestic product gdp is one of the most widely used indicators of its economic performance despite strong interest in and great efforts made towards assessing the contribution of aquaculture and fisheries to gdp there is a general lack of understanding or consensus on how to properly measure the sector s contribution to gdp and effectively use the measures for evidence based policy and planning for sustainable aquaculture and fisheries development while a fisheries gdp measure has been included in the sustainable development goals sdgs of the 2030 agenda for sustainable development i e sdg indicator 14 7 1 sustainable fisheries as a percentage of gdp in small island developing states least developed countries and all countries it is nevertheless a tier iii indicator for which no internationally established methodology or standards are yet available this paper contributes to improving the understanding and measurement of aquaculture and fisheries contribution to gdp by i using input output models including mathematical formulas and numerical examples to formulate and clarify a set of measures of aquaculture and fisheries contribution to gdp ii discussing alternative methods to estimate the measures under data poor environments iii suggesting

an empirical methodology and general guidelines on the estimation and reporting of the measures and iv exploring how to utilize the measures for evidence based policy and planning the conceptual framework and empirical methodology suggested in the paper will help move towards internationally established methodology standards and guidelines on measuring aquaculture and fisheries economic contribution

darwin s book on evolution admitted that intermediate links were perhaps the most obvious and serious objection to the theory of evolution darwin recognized that the fossils collected by scientists prior to 1859 did not correspond with his theory of evolution but he predicted that his theory would be confirmed as more and more fossils were found one hundred and fifty years later evolution the grand experiment critically examines the viability of darwin s theory

did you know that half of all the animals in the world that have backbones are fish there are more kinds of fishes than there are amphibians reptiles birds and mammals added together and scientists are discovering more species of fish almost weekly brilliantly colored or camouflaged as big as a whale or smaller than a little fingernail fishes are found almost everywhere there is water the fish classes explores the origins of the first fishes with a glimpse of some of the extraordinary varieties that became extinct long ago the book also examines the five classes of modern fishes surveys their physical features habitats and ways of life as well as some of the threats they face today book jacket

a photo essay about the natural world of fish and their importance in human life

provides an up to date comprehensive and readable introduction to the field of human evolution human evolution evolutionary theory evolutionary genetics primate socioecology hominin fossil record students or practitioners of anthropology in need of a current and comprehensive introduction to the field of human evolution
