more urgent than ever two landmark essays by the legendary political theorist on the greatest threat to democracy gathered with a new introduction by david bromwich no one hannah arendt observed has ever counted truthfulness as a political virtue but why do politicians lie what is the relationship between political lies and self delusion and how much organized deceit can a democracy endure before it ceases to function fifty years ago the century's greatest political theorist turned her focus to these essential questions in two seminal essays brought together here for the first time her conclusions delivered in searching prose that crackles with insight and intelligence remain powerfully relevant perhaps more so today than when they were written in truth and politics arendt explores the affinity between lying and politics and reminds us that the survival of factual truth depends

on the testimony of credible witnesses and on an informed citizenry she shows how our shared sense of reality the texture of facts in which we wrap our daily lives can be torn apart by organized lying replaced with a fantasy world of airbrushed evidence and doctored documents in *lying in politics* written in response to the release of the pentagon papers arendt applies these insights to an analysis of american policy in southeast asia arguing that the real goal of the vietnam war and of the official lies used to justify it by successive administrations was nothing other than the burnishing of america's image in his introduction david bromwich *american breakdown the trump years and how they befell us* engages with arendt's essays in the context of her other writings and underscores their clarion call to take seriously the ever present threat to democracy posed by lying

there is no better book on fascism's complex and vexed relationship with truth jason stanley author of *how fascism works the politics of us and them* in this short companion to his book *from fascism to populism in history* world renowned historian federico finchelstein explains why fascists regarded simple and often hateful lies as truth and why so many of their followers believed the falsehoods throughout the history of the twentieth century many supporters of fascist ideologies regarded political lies as truth incarnated in their leader from hitler to mussolini fascist leaders capitalized on lies as the base of their power and popular sovereignty this history continues in the present when lies again seem to increasingly replace empirical truth now that actual news is presented as fake news and false news becomes government policy a brief history of fascist lies urges us to remember that the current talk of post truth has a long political and intellectual lineage that we cannot ignore

bill adair knows a lie when he hears one since 2008 the site he founded *politifact* has been the go to spot for media members and political observers alike to seek the truth in an increasingly deceitful world since the site's launching politics' tenuous relationship with the truth has only gotten weaker and weirder
