the universality of shamanistic power and practice among today s hunter gatherers along with the similarity of rock art found in varied sites around the world has led jean clottes and david lewis williams to suggest in this new book that the great art of paleolithic caves can be best understood through the lens of shamanism indeed this is not a monograph on a particular site but a general discussion of the art of painted caves and their shamanistic meaning through the authors revealing words and the abundant full color illustrations we follow shamans into their trance states and we watch as they carefully paint and engrave on rock surfaces the shapes of animals whose power they seek as we learn how drawings and rituals were likely modes of shamanistic contact we understand best the actions accomplishments and traces left behind by prehistoric shamans

wayward shamans tells the story of an idea that humanity's first expression of art religion and creativity found form in the figure of a proto priest known as a shaman tracing this classic category of the history of anthropology back to the emergence of the term in siberia the work follows the trajectory of european knowledge about the continent's eastern frontier the ethnographic record left by german natural historians engaged in the russian colonial expansion project in the 18th century includes a range of shamanic practitioners varied by gender and age later accounts by exiled russian revolutionaries noted transgendered shamans this variation vanished however in the translation of shamanism into archaeology theory where a male sorcerer emerged as the key agent of prehistoric art more recent efforts to provide a universal shamanic explanation for rock art via south africa and neurobiology likewise gloss over historical evidence of diversity by contrast this book argues for recognizing indeterminacy in the categories we use and reopening them by recalling their complex history

starting with the dawn of what we would recognise as modern human thought this book journeys through 35 000 years of our human past it shows how our earliest ancestors learnt to enter trance states and the revolutionary effect this had on the way they interacted with their world moreover by marrying the very latest research with vivid first person reconstructions the book will actually take readers back in time in its pages we join stone age hunting parties steal food from desperate starving cannibals sit eye to eye with a mouldy bronze age mummy and join the celts for a feast where you truly are what you eat the story of our past has never been told this way before and has never been brought to life with such vividness this is the past as our ancestors would have known it

shamanism is a term with specific anthropological roots but which is used more generally to cover a set of interactions between a practitioner or shaman and a spiritual or religious realm beyond the reach of most members of the community it has often been considered from an anthropological viewpoint but this book gathers the most recent studies on a subject which has not been comprehensively studied by archaeologists by putting together experts from two continents who have studied the phenomenon of shamanism lands of the shamans through carefully selected case studies uses the archaeological evidence to construct the shamans worldview landscape and cosmology recent interdisciplinary studies support the idea of the existence of shamanistic representations as long ago as the middle upper palaeolithic but at the same time do not follow developments during the history of humankind as ethnographic evidence shows shamanistic activity represents a complex phenomenon that is extremely diversified its spiritual activity possessing a large variety of expressions in the material culture in other words shamanism could be defined as a series of differing spiritual world views which model the material culture and the landscape throughout the archaeological record of all prehistoric and historic periods there is a series of visual representations and objects and landscape alterations that could be ascribed to these differing world views many thought to represent shamanistic cognition and activity the shaman's landscape reveals itself to the world as one of multifaceted spiritual and material activity consequently this first book dedicated completely to the shamanistic landscape presents in fresh perspective the

landscapes of the lower and upper worlds as well as their phenomenological experience case studies come from europe north america and asia

robert j wallis explores the interface between the new and prehistoric shamans of popular culture and anthropology drawing on interviews with a variety of practitioners particularly contemporary pagans in britain and orth america

shamans of the lost world bridges the gap between recent work in the cognitive sciences and some of humankind s oldest religious expressions in this detailed look at the prehistoric shamanism of the ohio hopewell remain uses cognitive science archaeology and ethnology to propose that the shamanic world view results from psychological mechanisms that have a basis in our cognitive evolutionary development the discussions in this volume of the most current theories concerning how early peoples came to believe in spirits and gods as well as how those theories help account for what we find in the archaeological record of the hopewell are of interest to archaeologists and cognitive scientists alike

the dream on the rock takes an interdisciplinary approach to contextualizing and historicizing the phenomenon of shamanism from the neolithic age until the beginning of the iron age fulvio gosso and peter webster argue that rock art and other ancient materials provide a glimpse of the fundamental role played by nonordinary states of consciousness in our social and evolutionary prehistory ultimately the authors offer a comprehensive exploration of shamanism religion and the origins of human consciousness along with evidence that hallucinogenic plants may have played a key role in this process

this book emerged from two sessions of the 4th international conference of the international society for shamanic research held in france in 1997 one session was devoted to prehistory another to urban shamanisms and neo shamanisms all the papers published in the second part of this book devoted to modernizing societies were presented at the conference discussions on prehistory developed subsequently and new contributions have also been included

drawing on the most up to the minute research on prehistoric art an anthropologist presents a global survey starting with the first explosion of imagery that
