this book has many merits it will make fascinating reading for the increasing number of organizational scholars who wonder how organizational research can engage more in accounting for the impact of corporations on their environment in a broad sense bahar ali kazmi bernard leca and philippe naccache organization studies this book is for those who will enjoy a thoughtful and informative monograph that acutely summarises and refreshes critique from a political and sociological perspective it is a comprehensive re interpretation of the corporate world and the evidently meretricious regime of csr which makes it an enjoyable compendium for critical management studies fans this erudite volume will be valuable to mainstream social science academics either involved in or dismissive of csr and sustainability discourses in management education and research david bevan scandinavian journal of management banerjee's book is thought provoking and must be read but it should be read not only by corporate social responsibility scholars but by all business scholars it is through banerjee's provocations that we can understand the shortcomings of corporate systems and the boundaries of corporate social responsibility pratima bansal administrative science quarterly this is a tour de force that carefully assembles and incisively interrogates perhaps the most pressing problem of our age how to harness the resources of corporations to tackle global problems of poverty oppression and environmental degradation banerjee does not present us with glib pronouncements or simplistic fixes instead he brilliantly illuminates the scale of the challenges and lucidly assesses the relevance and value of csr responses to date hugh willmott university of cardiff uk bobby banerjee takes on the popular mythologies of neo liberal corporate social responsibility with enviable flair and a thoroughness of scholarship that will dismay its apologists his critique extends from the origins of the modern corporation and its well known abuses and excesses to far harder targets the more attractive alternatives that have been developed for theory and practice that as banerjee shows brilliantly only serve to mask continuing neo colonial abuses banerjee
