people know me as the author of the story of art who have never heard of me as a scholar

but many of my colleagues have never read the book they may have read my papers on Poussin or Leonardo but not that it is a curious double life. Sir Ernst Gombrich is one of the very few men able to lead such a double life as familiar to the general public as to academicians. Recently the French intellectual Didier Eribon engaged in a series of probing conversations with Gombrich seeking to discover how his mind and attitudes had been formed during his early years in Vienna and how they developed after he emigrated to England in 1939. There Gombrich wrote *The Story of Art*, his acclaimed introductory art survey, and became director of the Warburg Institute in London. The result of the dialogue between these two men is found in this fascinating and thought-provoking volume. Gombrich tells of reading, examining, pondering and talking to numerous historians, psychologists, artists and philosophers among them Erwin Panofsky, Karl Popper, Oskar Kokoschka and Konrad Lorenz about subjects ranging from art history to biology and zoology. The reader observes one of our century's most acute minds as he informally brings together all the themes that have preoccupied him for over sixty years: the meaning of paintings, especially those of the Renaissance; the relation between representational art and perception and the way in which our responses are conditioned by conventions, history, social pressures and changes of taste; as undogmatic, skeptical and wide-ranging as ever, Gombrich not only provides a brilliant account of his life's work but also makes us think anew about fundamental issues, provoking as many questions as he answers.

A groundbreaking account of perception and art from one of the twentieth century's most important art historians, E.H. Gombrich is widely considered to be one of the most influential art historians of the twentieth century. *Art and Illusion* is generally agreed to be his most important book bridging science and the humanities. This classic work examines the history and psychology of pictorial representation in light of modern theories of information and learning in visual perception, searching for a rational explanation of the changing styles of art. Gombrich reexamines ideas about the imitation of nature and the function of tradition. In testing his arguments he ranges over the history of art from the ancient Greeks, Leonardo and Rembrandt to the impressionists and the cubists. But the triumphant originality of *Art and Illusion* is that Gombrich is less concerned with the artists than with the psychological experience of the viewers of their work.
