*the shining ones were members of an advanced culture that was almost lost but their wisdom and their power survived they preserved the secrets of their advanced knowledge in mythology and legend they embedded their secret codes in symbolism in art architecture the mystery traditions and literary works including the bible the authors have found traces of the influence of the shining ones in all the major religions with roots in the ancient world gardiner and osborn have discovered that their secrets and rituals have been hidden and preserved through the centuries by the knights templar the rosicrucians and the freemasons to the present day furthermore they believe that the evolution of civilization has been manipulated by a secret and powerful group of initiates descended from the shining ones they can identify their influence behind science religion mysticism and philosophy and of course in the arena of powerful politics this is an extraordinary story of intrigue and power play at a very human and political level but it is also the revelation that the shining ones had knowledge of the deep spiritual truth that lies at the heart of mankind s yearning for an understanding of the meaning of life and to achieve salvation*

*for many years now there has been an upsurge in revelation stories and alternative viewpoints on man s history people such as graham hancock and lawrence gardner have brought to light many new ideas and many new problems now there is a new theory which is all encompassing and clearly brings into focus a more sinister reason behind the emergence of civilisation in his theory on atlantis graham hancock is receiving much admiration and academic acclaim standard academic thought is more towards the spontaneous eruption of civilisation across the globe with little or no explanation of why there are so many similarities between the cultures now philip gardiner in his new book the shining ones is set to turn even this upon its head the theory is so simple that it begs the question why has it not been thought of before the reason for universal similarity of architecture language art travel and religious belief is quite simply an ancient and secret religious brotherhood who have hidden themselves deep within the symbols ciphers and codes of our ancient texts for hundreds of years they held a secret knowledge and power base which spread with them across the globe the very title that they have given themselves is hidden within the standard text and religious books we use every day the shining ones put like this the whole thing can sound like an x files conspiracy theory however the author has invested huge amounts of time and energy checking researching and seeking the advice of academics now the theory is attracting the attention of historians who can see that the patterns are as subtle as this author proposes the fact is this theory does explain away all the problems*

*with dating and variations that people such as hancock have come up against many academics and especially egyptologists are now turning to this way of thinking and with gardiners spirit and broad knowledge in history and language the history of the ancients and the secrets that they hold are becoming more clear there are of course dissenters the author has been accosted for his standpoint and there are still those hardened academics and even non academics who refuse to even listen however there is a major tv documentary in pre production stages and with interviews planned across the nation on radio and tv the message may soon be accepted as a credible theory*

*this is a new release of the original 1955 edition*
