in act 1 scene iv of macbeth duncan reflects that there s no art to find the mind s construction in the face in contrast the claim that andy young sets out in this book is that we are now developing a science of face perception which can indeed shed light on certain aspects of mentallife face and mind consists of a series of seminal research and review papers on face perception published by the author and his colleagues over the last 12 years a comprehensive introductory chapter written especially for this volume serves to draw together the various themes explored in the different contributions the book examines the question of how faces are special in terms of their social biological and theoretical roles in particular face and mind seeks to determine what our understanding of the face can tell us about the human brain it discusses the evidence for anevolved neural substrate for face perception and the question of whether we are innately predisposed to recognise faces to find them attractive and to decode the many social signals they give us the ability of the human brain to process and remember the many different faces that we see andsubsequently recall is analysed young includes detailed studies of the types of impairment to face perception which can follow brain injury or psychiatric illness and uses them to address these questions as well as other issues of high intrinsic and interdisciplinary interest these include theextent to which our mental lives result from the operation of discrete components devoted to different purposes the differences between conscious and non conscious processes and how we use evidence to support our beliefs about the world because of the huge variety of social signals read from theface it can offer unique theoretical and philosophical insights into these questions this fascinating book will be of interest not only to psychologists and neuropsychologists working in the field of visual perception but to cognitive scientists generally it provides an excellent summary ofthe most important theorietical and empirical work done on face perception in recent years and as such will be of interest to advanced undergraduate and post graduate students in psychology philosophy and cognitive science

insights into the workings of the mind as revealed through current brain mind research includes simple exercises for making that information transformative knowledge

at one level of analysis a face is merely a visual object a pattern of light cast across the retina that can be described in terms of its lines colors and textures however these basic features give rise to the recognition that the face belongs to another living being endowed with the potential for thoughts feelings actions and interactions it is for this reason that faces are exceptionally salient accordingly face perception has been extensively studied but much of this work has compared human faces to non face stimuli e g houses shoes etc which differ in both form faces have a distinct configuration and animacy faces hold cues to life and mind as a consequence it is unclear which of these findings reflect the processing of form the processing of animacy or both in service of better understanding how the perception of a face drives the recognition of a mind this dissertation utilized two types of comparisons first human faces were compared to object faces that are recognizably face like but do not possess mental states e g statues mannequins this comparison examined how faces with minds are processed as distinct from faces without minds second to investigate the facial cues that convey that a mind is attending and worthy of social cognitive resources we compared images of human faces that were mentally engaged to images of faces that were unengaged across all studies an overarching theme emerged in which there are two stages of face perception rapid indiscriminate face detection followed by a secondary stage that scrutinizes faces for the presence of mind this research elucidates how face perception and mind perception interact helping people to efficiently navigate their social world
