excerpt from english and american philosophy since 1800 a critical survey in making an attempt to estimate the philosophical ideas of the last century and a quarter i have endeavored as a historian to be accurate and as impartial as nature will permit a philosopher to be when dealing with opinions more or less out of harmony with his own but it may prevent misleading anticipations if i confess at the start that the tracing of historical affiliations and historical causes has had only a secondary interest for me and that the book as a whole is frankly propaganda and designed to recommend one particular attitude as against competing attitudes apart from this critical interest it is not very likely that the work would have been carried through if it were urged that fewer pages of criticism and more attention to historical and descriptive data would have resulted in a more generally useful volume i do not know that i should be prepared to combat the claim though i think it might be argued that one way and at times the only way to give an intelligible account of a philosophical doctrine especially of the more esoteric sort is by pointing out its limitations and obscurities my real excuse however for writing a book in which criticism plays so large a part is that i wanted to do so the particular philosophical standpoint which the following pages presuppose as a background is one which i am regret fully aware many philosophers perhaps most of them will regard as lamentably crude and unadventurous typically two conceptions have been predominant in the history of thought the psychological and the logical about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections
