we see it all the time organizations strive to persuade the public to change beliefs or behavior through expensive expansive media campaigns designers painstakingly craft clear resonant and culturally sensitive messaging that will motivate people to buy a product support a cause vote for a candidate or take active steps to improve their health but once these campaigns leave the controlled environments of focus groups advertising agencies and stakeholder meetings to circulate the public interprets and distorts the campaigns in ways their designers never intended or dreamed in best laid plans terence e mcdonnell explains why these attempts at mass persuasion often fail so badly mcdonnell argues that these well designed campaigns are undergoing cultural entropy the process through which the intended meanings and uses of cultural objects fracture into alternative meanings new practices failed interactions and blatant disregard using aids media campaigns in accra ghana as its central case study the book walks readers through best practice evidence based media campaigns that fall totally flat female

condoms are turned into bracelets aids posters become home decorations red ribbons fade into pink under the sun to name a few failures these damaging cultural misfires are not random rather mcdonnell makes the case that these disruptions are patterned widespread and inevitable indicative of a broader process of cultural entropy
